Hey Brittney, I am needing acknowledgement that DETEC has received the information needed for "critical load provider". I sent the information on 1-24-2022. Thanks, Jimmie Langston

**Subject:** Project 52299

Mr, Langston,

Per our conversation, other water systems have sent us either a spreadsheet or a one page statement on their letterhead detailing the meter #s of their facilities, the location and emergency contact details. All have cc'd the PUC and their local County Emergency Management office. To fulfill the "requirement," if you'd like, you can email me that info for your system and I will add it to our files. I mentioned a form I could send you, but after looking at it, it only pertains to oil and gas units, not water systems. When I receive your document, I can provide you an acknowledgement that we have added it to our files. Hope this helps!

Re: Results of Critical Load Application Review

Dear Jimmie Langston:

Oncor has completed the review of your critical load application. In the attached spreadsheet, column C provides the status (Approved or Denied) for each requested ESI ID. Column D provides the reason for denial if any of the ESI IDs have been denied Critical Load status. The Public Utility Commission of Texas (PUCT) defines a Critical Load Public Safety Customer in Substantive Rules 25.497(a) as "A customer for whom electric service is considered crucial for the protection or maintenance of public safety, including but not limited to hospitals, police stations, fire stations, and critical water and wastewater facilities."

***Designation of a critical load does not guarantee an uninterrupted supply of electricity. It is the responsibility of the Retail Customer to make arrangements for alternative sources of electric power should a localized outage or load shed event occur.***

As provided in Sections 4.2.5, 5.2.5, and 5.3.7.1 of Oncor's Tariff for Retail Delivery Service, Oncor shall, if reasonably possible, provide notice to Critical Load Public Safety Customers when Oncor curtails, reduces voltage, or interrupts delivery service during an emergency or other necessary event. Your location will be enrolled in the My Oncor Alerts program using the email addresses provided in the application. Oncor uses this program to communicate these types of events to our customers.

Please let us know if you have any questions by replying to this email.

Regards,
