Re: Project 52299
Style: COORDINATION OF EMERGENCY OPERATIONS PURSUANT TO TWC §13.1396(C)
Filing Party: El Tanque Water Supply Corporation (WSC)

Dear Sir / Madam:

On behalf of the El Tanque WSC, Enprotec / Hibbs & Todd, Inc. is providing the coordination of emergency operations pursuant to TWC §13.1396(C). The required information is provided as follows:

- Water Utility Name: El Tanque WSC
PWS ID: TX2140029
- Location and general description of all critical load water facilities:

The location and general description information along with additional details for each facility has been provided to the electric utility that provides transmission and distribution service and retail service (Medina Electric Cooperative (Medina)); the critical load application is attached that contains the required information. The coordination emails are attached.

All critical facilities are located in Starr County.

- Emergency contact information:

The emergency contact information is included in the Medina application including a point of contact, alternate point of contact, and mailing address.

This letter is being sent to the Public Utility Commission, the County Emergency Management office in which the utility has water facilities that qualify for critical load (Starr County), and the Texas Department of Emergency Management (TDEM).

Application for Critical Load Serving Electric Generation and Cogeneration

CRITICAL LOAD DESIGNATIONS ARE REVIEWED EACH YEAR APRIL 1 FOR SUMMER PEAK and OCTOBER 1 FOR WINTER PEAK

This Application should be completed in order to request the designation of Critical Load Serving Electric Generation and Cogeneration. A separate Application must be submitted to each electric utility provider. Do not include premises served by different electric utilities in a single Application. Multiple premises, served by a single electric utility, may be submitted with a single form, provided that the information requested below is provided for each metered location.

The designation shall only be requested for individual premises (meters) that provide electricity to natural gas production, saltwater disposal wells, processing, storage, or transportation such as a natural gas compressor station, gas control center, or other pipeline transportation infrastructure.

The customer must provide any changes to customer or premise information as soon as practicable. The electric utility may request confirmation of the Critical Load designation and the customer must timely confirm that a premise previously designated as Critical Load continues to qualify for that designation. The utility may request more information prior to implementing the Critical Load designation.

DESIGNATION OF A CRITICAL LOAD DOES NOT GUARANTEE AN UNINTERRUPTED SUPPLY OF ELECTRICITY.

It is the responsibility of the customer to make arrangements for alternative sources of electric power should a localized outage or significant load shed event occur.

UTILITY NAME: El Tanque Water Supply Corporation (WSC)

CUSTOMER CONTACT INFORMATION

SERVICE ADDRESS

Customer Name associated with ESI-ID or Premise:

El Tanque Rural Water Supply

Medina Electric Coop Member #3242340

3 critical load facilities: Pump Station #1, Pump Station #2, La Sagunada Standpipe/Water Tower

Street (if street address is unavailable, please provide latitude/longitude, any nearby roadway, and/or distance to the closest town)

1. Pump Station #1: 2550 N. FM 755; 2. Pump Station (PS) #2: 6174 N. FM 755

3. La Sagunada Water Tower/Standpipe: La Sagunada @ 26.479637, -98.747462

City

Rio Grande City

Zip Code

78582

Premise Identifier (e.g., ESIID, Premise Number, Account Number):

1. PS #1: 163170656; 2. PS #2: 163170520; 3. Tower: 163166131

Describe equipment or premise served (e.g., production field, midstream processing plant, natural gas storage facility, gas compressor station saltwater disposal well or recycling facility, including the name of the generation unit(s) served by the infrastructure if known) and interdependencies (such as particular fields are tied to a particular midstream processing facility). Information regarding *production rate* (mcf/day) is also helpful:

Average daily production rate served by this premise for the past 12 months:

- $\geq 1,000$ mcf/d
- $< 1,000$ mcf/d and ≥ 250 mcf/d
- < 250 mcf/d

Describe any existing battery or backup capacity, or dual feed capability, including (1) the length of time the facility can operate without electricity from the electric utility and (2) the length of required time for start-up following a power outage:

N/A

Name of retail electric provider or electric utility that bills the customer for service:

Medina
