**SECTION B**  
**To Be Completed By Retail Customer**

**The criteria for qualification as a “critical load public safety customer” are set out in Public Utility Commission of Texas (PUCT) Substantive Rules § 25.497(a)(1) and § 25.52(c)(1). Generally, these are:**

"Loads for which electric service is considered crucial for the protection or maintenance of public safety; including but not limited to hospitals, police stations, fire stations, critical water and wastewater facilities, and customers with special in-house life-sustaining equipment."

Primary Contact: Water Waste Water Management Services Inc.

**AS A CRITICAL LOAD PUBLIC SAFETY CUSTOMER**

**SECTION C**

**Required Certification Information To Be Completed By Retail Customer Applying For Critical Load Public Safety Customer Status**

Review PUCT Substantive Rules § 25.497(a)(1) and § 25.52(c)(1) and explain the type of premise at the requested service location and why you believe that it should qualify for critical load public safety status.

Note that community water and wastewater facilities may qualify; however, individual wells, sewer lift stations or sump pumps are not considered crucial for the protection or maintenance of public safety.

My service qualifies as "critical load public safety customer" per the definition described in PUCT Substantive Rules § 25.497(a)(1) and § 25.52(c)(1) for the following reason(s).

This is a critical water facility pursuant to 16 TAC §25.497(a)(1).

Is there an alternate generation resource serving this facility?      Yes      x        No            

What is the capacity (size) of this generation resource?        250        kW

How long will this generation resource operate without refueling?      25        Hours

**DESCRIBE THE SPECIFIC PUBLIC SAFETY ISSUE THAT MAY RESULT FROM AN EXTENDED POWER INTERRUPTION: (Use additional sheet if necessary)**

We are a retail public utility providing large scale water service. This facility is a water plant, the operation of which is critical to the provision of potable water to our customers. An interruption of electric service may result in the loss of adequate system pressure, the issuance of boil water notices and the failure of the utility to deliver its public water supply.
