Dear Power Provider,

We are writing to you, as mandated by Texas Water Code 13.1396, in order to identify ourselves as a public water system to which you provide electric power and to identify the facilities which qualify for critical load status. Our public water system is operated under the name of South Cleveland Water Supply Corporation (SCWSC), Public Water System number TX1460140, Certificate of Convenience and Necessity (CCN) number 12566.

We have two wells located at the following addresses:

SCWSC Well #1
128 County Road 320
Cleveland, TX 77327
Liberty County

SCWSC Well #2
561 County Road 331
Cleveland, TX 77327
Liberty County

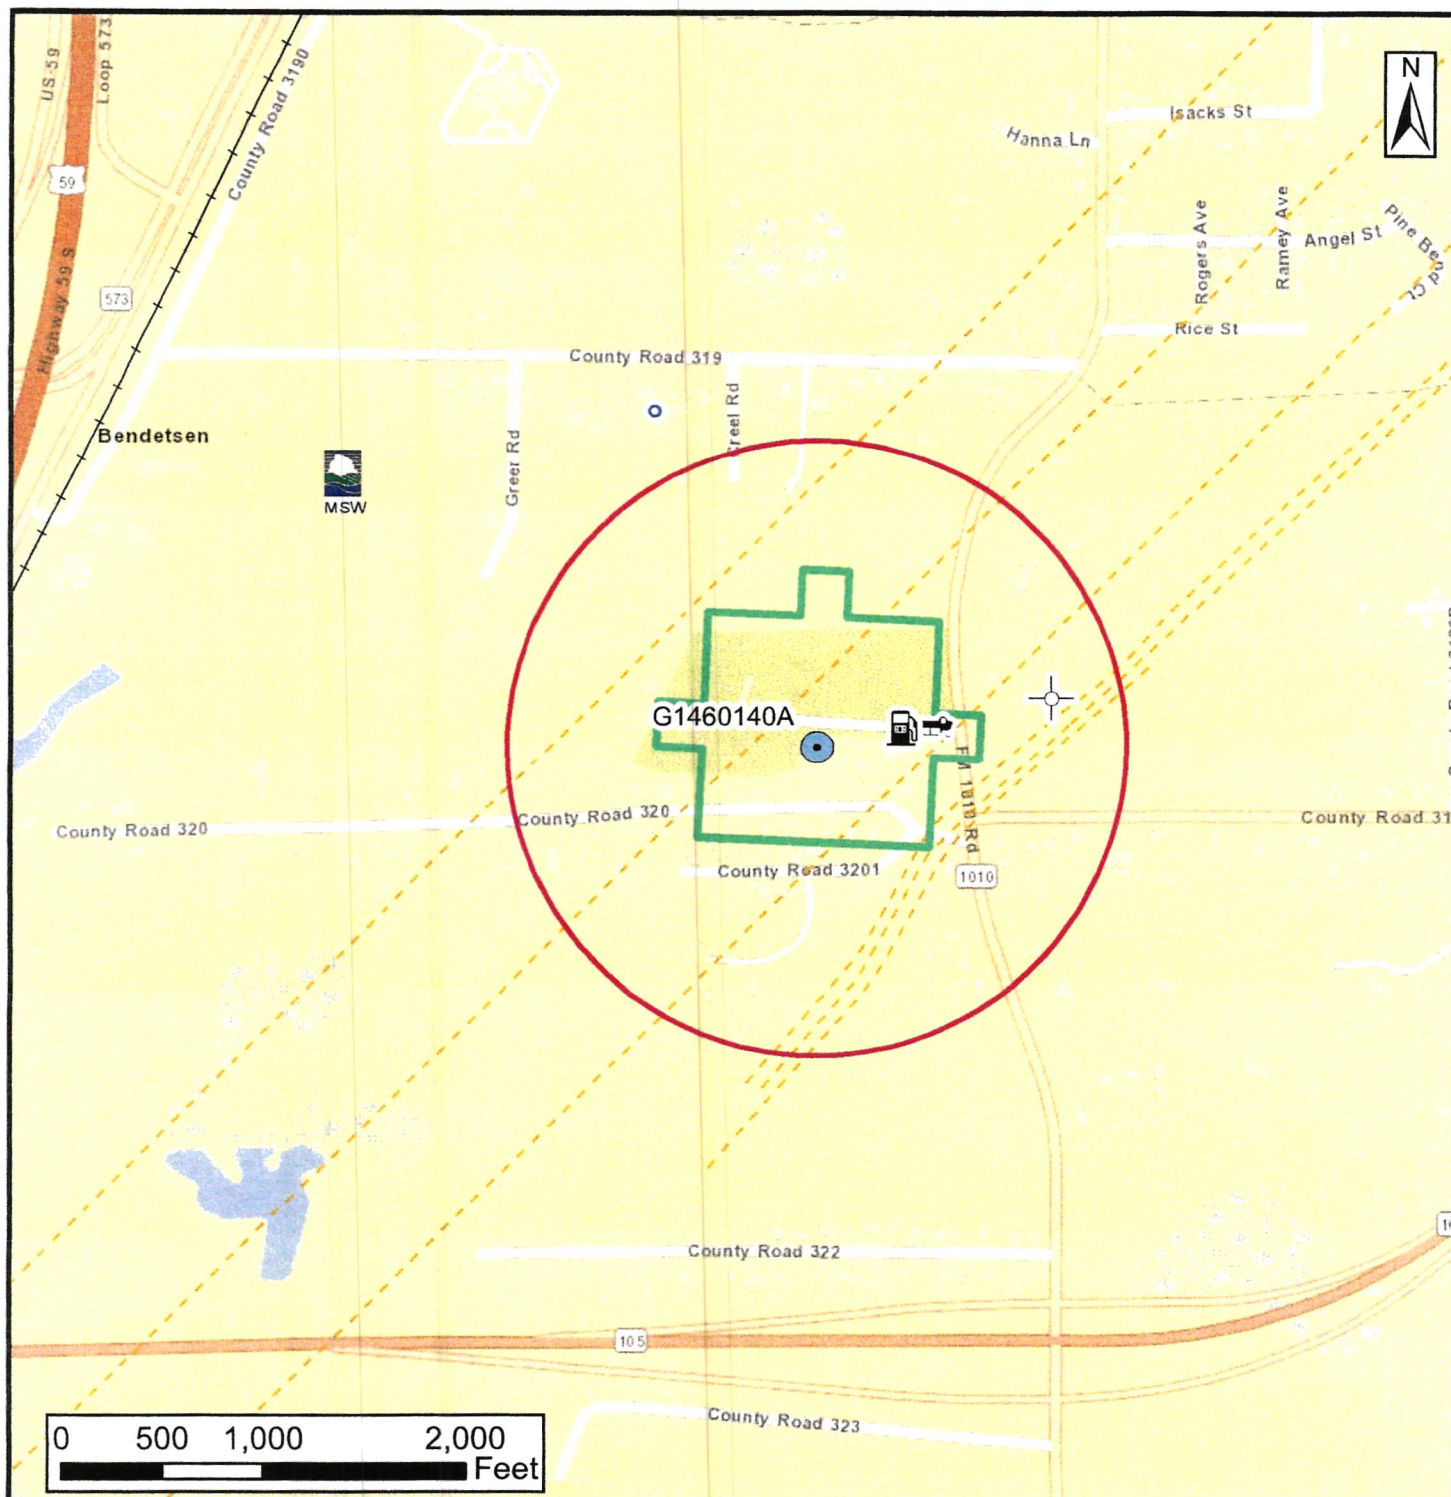

Each of these facilities are critically important in the production of potable water for the general public. Loss of power to any of these facilities will cause a reduction of water available for public use. We ask that each of these facilities be given critical load status. Maps showing the locations of these facilities are included with this letter.

Thank you for your cooperation in this matter. Our contact information is included on the last page of this letter. Please do not hesitate to reach to us if there is anything we can do for you.

Sincerely,

Cookie McKee
Office Manager
