**ItemNumber - 528**

### City of Newcastle PUCT information

This letter is providing the necessary information that needs to be filed in regards to being an “affected utility” under TWC 13.1394. The name of our water and sewer utility is the City of Newcastle. We own the Newcastle PWS 2520002 water system and the Newcastle Wastewater Treatment Plant (permit #WQ0010647003). Our water system is a gravity system so at no point in the system do we use electrical pumps to supply water. Our system is not directly affected by power outage however, Fort Belknap Water Supply Co supplies us our water and if they are affected by power outages then we could indirectly be as well if they could no longer deliver us water. Our Sewer system also uses gravity to function so I do not believe are sewer system would fall under critical load status.
