SECTION C

Required Certification Information To Be Completed By Retail Customer Applying For Critical Load Public Safety Customer Status

Review PUCT Substantive Rules § 25.497(a)(1) and § 25.52(c)(1) and explain the type of premise at the requested service location and why you believe that it should qualify for critical load public safety status.

Note that community water and wastewater facilities may qualify; however, individual wells, sewer lift stations or sump pumps are not considered crucial for the protection or maintenance of public safety.

My service qualifies as "critical load public safety customer" per the definition described in PUCT Substantive Rules § 25.497(a)(1) and § 25.52(c)(1) for the following reason(s).

\_\_\_\_\_

Is there an alternate generation resource serving this facility? Yes \_\_\_\_\_ No

What is the capacity (size) of this generation resource? kW

How long will this generation resource operate without refueling? \_\_\_\_\_ Hours

DESCRIBE THE SPECIFIC PUBLIC SAFETY ISSUE THAT MAY RESULT FROM AN EXTENDED POWER INTERRUPTION: (Use additional sheet if necessary)

We are a retail public utility providing large scale sewer service. The above described facility is a wastewater facility, the operation of which is critical to the transmission and disposal of untreated sewage. An interruption of electric service may create a public health hazard by resulting in the discharge of untreated sewage into the waters of the State of Texas.
