Olan Kelley
Mayor
City of Highland Haven

Attached: PEC Critical Loads Program designation letter

Cc: Sunset Utilities

June 24, 2021

Dear Olan,

Your recent application submission to the PEC Critical Loads Program has been received and reviewed. The following site(s) have been designated as a Critical Load based on criteria outlined by PEC.

| Account # | Name | Service Location | Address | Meter |
|------------|------------------------|------------------|------------------------------------|--------|
| 3000148915 | City of Highland Haven | 5622174199 | 510 A Highland Drive (Water Plant) | 365548 |
| 3000279759 | City of Highland Haven | 5716905970 | 510 A Highland Drive (Well) | 267826 |
| 3000279747 | City of Highland Haven | 5715324000 | 510 A Highland Drive (Well) | 582336 |

This Critical Load designation allows for the site(s) listed to be given priority, but **will not be exempt** from any rotating outages PEC may be called on to deploy as directed by ERCOT. At any time if rotating outages are in effect, you will be notified as such upon the deployment and recall of such events. Priority designation for these sites means that PEC anticipates the ability to provide advanced notice of any rotating outages as well as priority restoration if service at the site is interrupted due to rotating outages.

PEC does not guarantee an uninterrupted, regular, or continuous power supply. Locations registered in the program are not exempt from planned service interruptions, nor are registered members exempt from their financial responsibilities or the termination of service in accordance with PEC policies. When planned outages or service interruptions for nonpayment are scheduled, we will attempt to provide advance notice so preparations can be made. For unplanned outages, PEC will prioritize Critical Loads Program participants for restoration as much as practicable.

As part of the PEC Critical Loads Program, this application and review process will be conducted annually. Sites previously deemed as Critical Loads will be reviewed and have the ability to be added or removed from this designation. PEC will work with members to provide advanced notice when available to mitigate the impact to your business operations.

If you wish to provide any comments or have questions regarding the Critical Loads Program, you may contact criticalloadsrequests@peci.com or call 830-454-3114.
