**Re: Project 52299**  
**Style: COORDINATION OF EMERGENCY OPERATIONS PURSUANT TO TWC §13.1396(C)**  
**Filing Party: City of Santa Anna**

Dear Sir / Madam:

On behalf of the City of Santa Anna, Enprotec / Hibbs & Todd, Inc. is providing the coordination of emergency operations pursuant to TWC §13.1396(C). The required information is provided as follows:

- Water / Wastewater Utility Name: City of Santa Anna
- Public Water System: City of Santa Anna  
PWS ID: TX0420002
- Wastewater System: City of Santa Anna
- Location and general description of all critical load water and sewer facilities:

The location and general description information along with additional details for each facility were provided to the electric utilities that provide transmission and distribution service (AEP and Coleman County Electric Cooperative (CCEC)) and retail electric provider that sells electric power to the utility (TXU in the AEP service area); the critical load applications for AEP and CCEC are attached which contain the required information. The coordination verification emails are attached following the critical load applications.

All facilities are located in Coleman County.

## AEP Texas Application for Critical Load Industrial or Critical Load Public Safety Designation

---

**SEND COMPLETED FORM TO: CriticalLoadAEPTX@aep.com**

This Application should be completed in order to request the designation of Critical Load Industrial Customer or Critical Load Public Safety Customer with AEP Texas, as defined below. The Application must be submitted to AEP Texas at the email address above. Do not include premises served by another utility in this Application.

Critical Load Public Safety Customer -- A customer for whom electric service is considered crucial for the protection or maintenance of public safety, including but not limited to hospitals, police stations, fire stations, and critical water and wastewater facilities.

Critical Load Industrial Customer – An industrial customer for whom an interruption or suspension of electric service will create a dangerous or life-threatening condition on the retail customer’s premises, is a “critical load industrial customer.”

**Designation of Critical Load does not guarantee an uninterrupted supply of electricity.** It is the responsibility of the customer to make arrangements for alternative sources of electric power should a localized outage or load shed event occur.

AEP Texas may request more information prior to implementing a designation.

## Critical Water Load Application

Not all facilities are eligible for status as critical load and the PUC has not yet provided criteria to make this determination. When the PUC provides clear criteria on this issue thru rulemakings, Coleman County Electric Cooperative, Inc., will follow the PUC rules. This form was created for critical water facilities needing to meet the November 1, 2021 deadline for contacting their electric provider and may change after the PUC provides clear criteria thru rulemaking.

Eligible facilities will be "prioritized" for service and restoration, but the critical status does not guarantee an uninterrupted supply of power. CCEC may use discretion in determining how to prioritize critical load. If the facility requires guaranteed service, please consider acquiring backup capabilities.

Name of Water/Sewer Company: City of Santa Anna

Electric account number and meter number or numbers:

All of these meters are located at the City of Santa Anna Wastewater Treatment Plant

MOUNT SYS + SL	Acct 14139	Meter # 30027472
SEWER FRM + SL	Acct 14139	Meter #30027531
SEWR PMP	Acct 14139	Meter # 60000781
FLOW METER	Acct 14139	Meter # 30027486

Identify location or locations and provide a written, general description of all water and sewer facilities that qualify for critical load status (may include maps, if this would help you identify the location of the facilities):

The MOUNT SYS + SL (sewer pump lift station), the WWTP Pump SEWR PMP (main sewer pump), SEWER FRM + SL, and the FLOW METER are located at the City of Santa Anna Wastewater Treatment Plant (WWTP). The WWTP is located at approximately 3,430 feet west of the intersection of CR 272 and US Hwy 283, south of Santa Anna, in Coleman County. The facility latitude, longitude are 31.71875, -99.34249, respectively.

Written reasons as to why each facility should be considered critical load:

All of the meters are located at the City of Santa Anna Wastewater Treatment Plant (WWTP) which is a critical need sewer facility to ensure the on-going treatment of wastewater.

**Average use over the last 12 months for each facility:**

The September bill indicates a usage of 258 kWh which is likely typical usage.

**Backup Power capabilities for each facility. Please include 1) length of time facility can operate without electricity and 2) length of required time for start-up following a power outage:**

Not available

**Emergency contact and alternate contact information (work and cell number, email):**

Good Day Synda,  
On behalf of the City of Santa Anna, please see the attached CCEC Critical Load Application Form for the Critical Load meters within the Coleman County Electric Cooperative (CCEC) service area. The critical load meters are all located at one facility – the City of Santa Anna Wastewater Treatment Plant; it is located in Coleman County. This email is provided pursuant to TWC §13.1396(C).

Please let me or the City of Santa Anna know if there are any questions or if additional information is needed. Thank you,
