Docket 52370

I would like to file a pleading with the Presiding Judge asking to set a prehearing conference to discuss resetting the hearing and resuming the procedural schedule. I have tried conferring with the parties with no success.

3/11/2023 Update:

Since the unsuccessful mediation, a new problem has been found concerning the main water well, specifically the underground water pump is in a critical state. Experts say the amperage this pump uses indicates the end of its' life cycle and needs to be replaced. The budget needed for the replacement is \$11,000. As you know, we have no reserves or capital to use for this replacement and ask that the judge would set a hearing at the earliest possible date to mitigate the effects of a possible loss of water pressure.

Residents have been made aware of the issue and encouraged to contact SOAH.

A response back asap would be much appreciated.

Thank you,

Hannah Krebs
