Filing Date - 2023-06-27 10:05:08 PM

Control Number - 52370

Item Number - 99

DOCKET 52370

In response to Mrs. Evans' filing #94:

Mrs. Evans uploaded a water application from AquaTech Utilities.

Upon review, we immediately noticed the posted water rates were from 2017. Furthermore, the addresses in the subdivision referred to by Mr. Evans, is a MUD that is operated by a private company, which is AquaTech. Please be aware that MUD districts are considered publicly owned water systems, and will charge up to 1.25% property tax annually.

The Whitewing subdivision is owned and operated by a privately owned water system which cannot collect taxes.

In response to Mrs. Evans' filing #'s 96 & 97:

Mrs. Evans uploaded an email from Baytown Airport.

Since EHU has multiple PWS's located in a widespread area from Sheldon to Dayton, it operates three locations for the storage of repair/maintenance supplies associated with that area. The water office is located in Sheldon and houses supplies for the Northwestern communities. The shop is located in Highlands, and houses mostly the repair supplies for the central communities. The Baytown Airport is located East of Baytown, and central to the Dayton and Cove communities. This storage area, while it can store chemicals such as sodium hypochlorite used as a disinfectant in the community systems, does not include this disinfectant, as it is not conveniently accessed by a delivery truck. This facility only houses certain repair items necessary for the communities in the Baytown area.

The cost for this storage is shared with another entity by 50%.
