PUBLIC UTILITY COMMISSION
FILING CLERK

Dear PUC: The old power Dickinson Bayou power plant could be an economical facility to evaluate immediately.

The infrastructure for distribution appears to be ready. We may only need a gas generator for power in the high need periods.

We do really appreciate the new regulation fining producers if they make a clumsy mistake and fail to produce power due to their poor planning.

We know power is complicated but we are willing to pay a little more to have reserve power when we need it.

Texas has the power. We will never forget the 240 lives lost in the bad freeze!!!!

Please plan ahead.

Respectfully yours
Gene Scott
