Intervention for proposed Transmission Line plans Per Luke Tamminga

Control (Docket no. 52455)

As Land owner and having agreed with Oncor to sell off part of my property for the Sub Station (Switch), I have proposed a suggested Route for the Transmission lines.

Route # 21 (A-B-D-S-AA-BB-GG-II-WW-VV-PP-QQ-OO) --Yellow highlight would be highly suggested.

or

Route # 144 (A-T-EEE-EEE1-CCC-XX-WW-VV-PP-QQ-OO) --Red highlight.

The reason being :

1. My compliance agreeing with Oncor's proposal purchasing part of my property.
2. Keeping my homestead, land, and farm clean with the best possibilities suitable for myself and Oncor.
3. Keeping my land clear for a future solar project which is in development on my property
for future renewable energy.

Either of these 2 routes will suffice for our Renewable energy future plans with the least amount of obstruction.

Thank you

Luke Tamminga
