**PUBLIC UTILITY COMMISSION
OF TEXAS**

**TWELFTH PROGRESS REPORT OF
DENTON COUNTY ELECTRIC COOPERATIVE, INC., D/B/A
COSERV ELECTRIC**

Denton County Electric Cooperative, Inc. d/b/a CoServ Electric files this progress report regarding compliance with Section 6 of House Bill 4150 (“HB 4150”), providing information regarding distribution lines on United States Army Corps of Engineers (“USACE”) property that CoServ Electric identified as non-compliant in its report and attestation filed in this docket on January 14, 2022 (“Initial Report”). By letter dated March 4, 2022, the Division of Compliance and Enforcement (“DICE”) of the Public Utility Commission of Texas (“Commission”) requested a progress report and additional information to be filed on a monthly basis. This is CoServ Electric’s twelfth monthly progress report, which is timely filed.

I. Twelfth Progress Report

In its last progress report, CoServ Electric identified four distribution line segments located in areas that could be suitable for a sailboat and remained non-compliant with the applicable clearance standards in Rule 232 of NESC Standard ANSI (c)(2) (“NESC Rule 232”). These four line segments remain in progress at Lake Ray Roberts or Lake Lewisville, as described below. Availability of atypical, taller poles continues to delay completion of construction for three of these line segments. Fortunately, CoServ Electric has received all materials to complete the Ray Roberts 20 project, and estimates construction for that project will be completed in two to three weeks.

1. Status of engineering design, permitting, and reconstruction.

The status of the four remaining distribution line segments is as follows:

- Ray Roberts 3 – In construction; waiting for further delivery of 75-foot and 80-foot wood poles.
- Ray Roberts 20 – In construction; all materials received; estimated completion in two to three weeks.

- Lewisville 31A – Electrician and customer still working with USACE to install new customer-owned meter pedestal and underground facilities to four existing boathouses and one security light. Once the pedestal is located, CoServ Electric design will be finalized and released to construction. CoServ Electric will remove all existing overhead facilities from USACE property after completion of underground service installation.
- Lewisville 34 – Permit approved; waiting for delivery of 90-foot concrete pole to begin construction.

Further information is provided in Attachments A and B attached hereto.

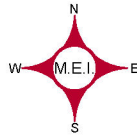

Date: February 13, 2023

Respectfully submitted,
