PROJECT NO. 52667

FILING OF ATTESTATIONS	§	PUBLIC UTILITY COMMISSION
DEMONSTRATING COMPLIANCE	§	
WITH HB 4150	§	OF TEXAS

**SIXTH PROGRESS REPORT OF
DENTON COUNTY ELECTRIC COOPERATIVE, INC., D/B/A
COSERV ELECTRIC**

Denton County Electric Cooperative, Inc d/b/a CoServ Electric files this progress report regarding compliance with Section 6 of House Bill 4150 (“HB 4150”), providing information regarding distribution lines on United States Army Corps of Engineers (“USACE”) property that CoServ Electric identified as non-compliant in its report and attestation filed in this docket on January 14, 2022 (“Initial Report”). By letter dated March 4, 2022, the Division of Compliance and Enforcement (“DICE”) of the Public Utility Commission of Texas (“Commission”) requested a progress report and additional information to be filed on a monthly basis. This is CoServ Electric’s sixth monthly progress report, which is timely filed.

I. Sixth Progress Report

In its last progress report, CoServ Electric identified five distribution line segments located in areas that could be suitable for a sailboat and remained non-compliant with the applicable clearance standards in Rule 232 of NESC Standard ANSI (c)(2) (“NESC Rule 232”). These five line segments remain in progress at Lake Ray Roberts or Lake Lewisville, as described below.

1. Status of engineering design, permitting, and reconstruction.

The status of the five remaining distribution line segments is as follows:

- Ray Roberts 3 – In construction; waiting for delivery of 75-foot and 80-foot wood poles.
- Ray Roberts 9 – Survey completed based on redesign of layout; permit submitted and approved; CoServ Electric is now working with USACE to gain access to the site, which requires adding a gate and tree removal in heavily wooded area.
- Ray Roberts 20 – Waiting on approval of permit submitted June 24, 2022.
- Lewisville 31A – Design and easement acquisition still in progress based on discussions with USACE and private landowner. The current proposal involves removal of CoServ Electric’s overhead facilities from USACE property and installation

of new underground service to four existing boathouses and a security light. CoServ is coordinating with an electrician regarding relocation of the landowner's electric service.

- Lewisville 34 – Permit approved; waiting for delivery of 90-foot concrete pole to begin construction.

Further information is provided in Attachments A and B attached hereto.

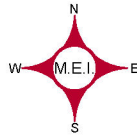

Date: August 10, 2022

Respectfully submitted,
