Homeowner complaint about proposed Purchase of Conroe Resort Utilities in Montgomery Texas.

Undine Development LLC has submitted for approval to purchase the Conroe Resort Utilities in Montgomery Texas,

They intend they will be doubling water rates upon purchase, The rates are already high and doubling them will cause hardship on homeowners. The facility has no back up generator so every power outage homeowners have no water. I was told if there is more than 250 connections a generator is required

Raising rates and not providing power upon outages is a double trouble.

This plat supplies the hotel and all of its water needs in addition to the homeowners.

We need some protection from proposed water rate hikes.
