Filing Description for Docket No. 52852

Resident Address: 3680 Kayewood, Little Elm, TX 75068

Residents: Rachel and Joshua Childers

This is a request to deny proposed changes to amend the home listed above within the Hilltown Addition.

We do not want to be included in the Hilltown Addition and would rather be included with water services provided by Little Elm since we been annexed into the City of Little Elm. Since being annexed into the City of Little Elm, we have not been provided with any sewer or water services and would rather have the City extend water services to our residence. The new rates proposed in Docket No. 52852 are 70%-75% higher than what we are currently paying to Terra Southwest and should we have to pay such a substantial increase in pricing we would rather it be paid to the City.

Should this docket not be avoided, we would like to be excluded from Little Elm city limits and would insist on being back within county line limits. Being included within the Hilltown Addition is not favorable and we would not like to be included with anything representing this underdeveloped area.

In conclusion, since we have been annexed into the City of Little Elm, we believe we should receive water services from the city. If we are to be included within Hilltown/Undine Texas, LLC water services, we believe we should be back within the Denton County line limits and not annexed within the city.

Thank you for your time,

Joshua Childers
