6.05 Extension Agreement (Continued)

equal to or in excess of the amount of such contribution, and that such funds, and the extension of such main and/or mains and appurtenances as above provided will result in, and be used for the purpose of, providing additional income to Transferee by said Transferee's sale of water service from said extended main and/or mains and appurtenances and by such means to enable Transferee to increase its sale of water from its presently unused capacity. In this connection it is anticipated by both Transferor and Transferee that connections will be made for water service to such extended main and/or mains and appurtenances and Transferor agrees to recommend the service of Transferee, and to encourage use of its water service as opposed to any other or different service.

IV

It is specifically provided that Transferor does not represent that any particular number of connections will be made by virtue of such main and/or mains and appurtenances being extended, and Transferee shall not be obligated in any manner to provide water service for the Transferor or any person, firm or corporation by and through such extended main and/or mains and appurtenances, except upon such terms and conditions and for the same consideration as water service is usually furnished under the policies, rules and regulations of Transferee which are in force when any individual party requests a connection to Transferee's water system.
