TECHNICAL PROBLEMS CONTACT LIST 2019

This list is intended to serve as a 'guide' for dispatchers and other UCS employees in order to know who to call in case of a technological failure or other unique and severe situation.

*If the problem is a severe failure of any of the systems, processes or severe situation, please contact the Staff level manager that is ultimately responsible for the area of concern and let them know that you have a problem, what the problem is, and that you have contacted the appropriate UCS employee to help fix it. If you cannot locate that supervisor, call Robert Bernhoft, Marty Haught or Cameron Smallwood and relay the same information.

Staff Level Managers and Responsibilities

Dispatch Issues: Marty Haught, ext.5223, cell.817.487.7009, hm.817.484.2582
Media Disclosure of Severe Situation: Marty Haught, ext.5223, cell.817.487.7009, hm.817.484.2582
Outage Software: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
Radio System: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
SCADA/DA: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
Network System: Robert Bernhoft, ext.5135, cell.254.396.2718
Telephone System: Robert Bernhoft, ext.5135, cell.254.396.2718
PORCHE IVR: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
iXp/MyAccount/AS400: Robert Bernhoft, ext.5135, cell.254.396.2718
Major Outage Situation: Marty Haught, ext.5223, cell.817.487.7009, hm.817.484.2582
Major Environmental Impact: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
Major Accident: Marty Haught, ext.5223, cell.817.487.7009, hm.817.484.2582
Cameron Smallwood, ext. 5222, cell.817.648.6515, hm.817.645.2133
Quentin Howard, ext. 6127, cell.817.253.5406, hm.254.968.0917

Dispatch Contacts: If there is some issue needed to be resolved by a supervisor directly relating to shift issues, employee issues, and any other dispatch duties, the contacts should be made in the following order until the issue is resolved. The issue should be able to be resolved by the first person in the below list.

Dispatch II: Sarah Ralph ext.5011, hm. 817.901.0125
Senior Foreman: Jerry Scott, ext.5119, cell.817.773.1237
Operations Manager: Ed Nunez, ext. 5128, cell 254.722.7027

OMS Contacts: If there is a problem with the DisSPatch software on either Dispatch clients, and you can successfully run the system including IVR interface, please use the working computer until business hours. If the software is not working, you will contact the people in the order listed below. The issue should be able to be resolved by the first person in the list.

Engineering Services Employees (next 3 listed)
Eng Services Technician: Faye Bayne, ext.5009, cell 682.459.7671
Eng Services Manager: Cory Menzel, ext.5137, cell.817.648.6354
V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
VENDOR-Milsoft Utility Solutions: office.800.344.5647, Ask for DisSPatch Support

Radio Contacts: There are several different types of problems that can exist with the radio system. The problems will be broken up into repeater issues, communication line issues, vehicle radio issues, portable radio issues and console issues. Contact the individuals in the order below. The issue should be able to be resolved by the first person in the list in most cases.

Radio Repeater Issues: This problem would be evident if vehicles could not talk to each other on the same repeater on the MAIN repeater channel they are operating on. Additionally, the console would not be able to talk to the radios on that repeater.

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348
IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705
IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141
IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382
V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892
V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718
VENDOR-Crosspoint Communications: office.972.730.4339, Ask for the Crosspoint Communications dispatcher to send someone to appropriate area, the keys necessary for entry into specific locations in the Cleburne dispatch room for most cases. Some cases exist where Brazos (contact system operator microwave extension 260) will have to be present if any work is to be done. These repeaters are: Granbury, Stephenville, Grandview and Miller Mountain (PK Lake). The Meridian repeater is accessible, but the Bosque County Sheriff's Office (254-435-2362) should be notified of plans to enter the building.

Radio Communication Line Issues: This problem would be evident if vehicles could talk to each other on the same repeater on the MAIN repeater channel they are operating on. However, the console would not be able to talk to the radios on that repeater. This can be verified, and in fact first diagnosed, by one or more of the channels in the TRBOnet Enterprise software being grayed out with "Disconnected" across it. The PK repeater (or Miller Mountain repeater as Brazos knows it) ties through a Brazos-owned unlicensed link and then to the Brazos Microwave. The Meridian repeater communication line ties through an AT&T phone line from Meridian to Waco and then over the Brazos Microwave to Cleburne. A problem indicated by the 'green LED' light should be directed in the following order.

Brazos System Operator: 260 on Brazos Phone, or 9.260.# on UCS phone, Tell them which repeater communication line is not operating properly and that we need someone to repair such.

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Crosspoint Communications: office.972.730.4339, If the above steps have not repaired such, ask for the Crosspoint Communications dispatcher to send someone to appropriate area, the keys necessary for entry into specific locations in the Cleburne dispatch room for most cases. Some cases exist where Brazos (contact system operator microwave extension 260) will have to be present if any work is to be done. These repeaters are: Granbury, Stephenville, Grandview and Miller Mountain (PK Lake). The Meridian repeater is accessible, but the Bosque County Sheriff's Office (254-435-2362) should be notified of plans to enter the building.

Vehicle Radio Issues: This problem would be evident if a specific vehicle radio could not talk to another radio but all other radios are working properly. If this is the case contact those in this order. One of the mechanics will most likely be able to resolve the issue. While a mobile issue is being resolved, the vehicle can utilize a portable radio.

Mechanic: Trent Halford, ext.4067, hm.682.429.7141

Mechanic: Sam Heathington, ext.6136, hm.817-573-8490, cell.817.408.5656

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Crosspoint Communications: office.972.730.4339, Ask for Crosspoint Communications dispatcher to dispatch someone onsite only in emergency situations where no other option is available. In most any case, the vehicle could take a portable while the mobile problem is being resolved.

Portable Radio Issues: This problem would be evident if a specific portable radio could not talk to another radio but all other radios are working properly. If this is the case contact those in this order. While a portable issue is being resolved, the employee can use a different portable radio.

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Crosspoint Communications: office.972.730.4339, Ask for Crosspoint Communications dispatcher to dispatch someone onsite only in emergency situations where no other option is available. In most any case, another portable radio can be utilized while the portable problem is being resolved.

Radio Console Issues: This problem would be evident if the console would not operate in any way on any channel or on some specific channel. If all the channels on TRBOnet Enterprise are not in an error state, then something is wrong with the console. The best thing to do is to close down the TRBOnet Enterprise software that has the problem. Start it back up. If this does not work, call those in the following order.

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Crosspoint Communications: office.972.730.4339, Ask for the Crosspoint Communications dispatcher to send someone to the Burleson office and make sure someone is onsite to allow them to resolve the problem.

Wave Issues: This problem would be evident if the Wave desktop communicators could not talk to any or all channels, but the consoles could still reach the mobiles and portables. If all channels are unavailable, or both channels at a single office site, then it is most likely a network or server issue. If a single channel is down, then radio equipment at the office MW site is most likely to blame. Call the below contacts in the following order:

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. Cooperative Planning: Jared Wennermark, ext.5138, cell.817.648.5927, hm.817.426-0892

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Crosspoint Communications: office.972.730.4339, Ask for the Crosspoint Communications dispatcher to send someone to the affected office only in emergency situations. If the Consoles are still working and dispatch can still communicate with people in the field, then Wave issues can wait until normal business hours.

SCADA Contacts: These contacts will be needed anytime SCADA communications is lost to a substation or other SCADA RTU. Additionally, if alarms occur that are major system malfunctions (not outages), they need to be reported as well. Contact the individuals in the order below. The issue should be able to be resolved by the first person in the list in most cases.

Eng Services Manager: Cory Menzel, ext.5137, cell.817.648.6354

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

Eng Services Technician: Faye Bayne, ext.5009, cell 682.459.7671

V.P. Cooperative Planning: Jared Wennemark, ext.5138, cell.817.648.5927, hm.817.426-0892
Brazos System Operator: 260 on Brazos Phone, or 9.260.# on UCS phone, Tell them what your problem is and that you need Bill Farley, Jon Booth, or Richard Allen to help resolve the issue as soon as possible.

VENDOR–CG AUTOMATION SOLUTIONS: office.973.379.7400, Only call this Vendor if no other option is available. When you call, ask for technical support and describe your problem to the Vendor. Most likely, they will not be able to assist you resolve the problem.

DA Contacts: These contacts will be needed anytime DA communications is lost to a device RTU including downline reclosers and switches. Additionally, if alarms occur that are major system malfunctions (not outages), they need to be reported as well. Contact the individuals in the order below. The issue should be able to be resolved by the first person in the list in most cases.

Planning Engineering Manager: Michael Lattner, ext.5008, cell 817-648-6348

Eng Services Manager: Cory Menzel, ext.5137, cell.817.648.6354

Eng Services Technician: Faye Bayne, ext.5009, cell 682.459.7671

Brazos System Operator: 260 on Brazos Phone, or 9.260.# on UCS phone, Tell them what your problem is and that you need Bill Farley or Jon Booth to help resolve the issue as soon as possible.

VENDOR–CG AUTOMATION SOLUTIONS: office.973.379.7400, Only call this Vendor if no other option is available. When you call, ask for technical support and describe your problem to the Vendor. Most likely, they will not be able to assist you resolve the problem.

Network Contacts: These contacts will be needed anytime the network check program indicates a failure or if any other major PC or Printer failure occurs that cannot wait till the next normal business day. The first three in the list are network employees who should be contacted first, by area. However, any of the three can be called to any area, but please only call on the first two if possible.

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

Telephone Contacts: These contacts will be needed anytime any part of the telephone checking process indicates a failure. The first three in the list are network employees who should be contacted first, by area. However, any of the three can be called to any area, but please only call on the first two if possible.

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Pathwayz Communications local office.806-350-9000 Only call if you can't reach any of the above individuals

PORCHE IVR Contacts: These contacts will be needed anytime the PORCHE checking process does not go as it should or if the system should fail during normal use. Call the contacts listed below in the order listed, the first person should be able to resolve the issue.

Eng Services Manager: Cory Menzel, ext.5137, cell.817.648.6354

Eng Services Technician: Faye Bayne, ext.5009, cell 682.459.7671

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

V.P. Cooperative Planning: Jared Wennemark, ext.5138, cell.817.648.5927, hm.817.426-0892

VENDOR-Milsoft Utility Solutions: office.800.344.5647, Ask for IVR Support.

iXp/MyAccount/AS400 Contacts: These contacts will be needed anytime the iXp/MyAccount/AS400 cannot be accessed for any reason. The first three in the list are network employees who should be contacted first, by area. However, any of the three can be called to any area, but please only call on the first two if possible. If none of the first three can be located, contact the IS & T Manager.

IS&T Administrator: Brad Mead, ext.5136, cell.817.648.5906

IS&T Administrator: Eric Cagle, ext.6109, cell.254.396.2705

IS&T Administrator: John Huffman, ext.4015, cell.682.228.8141

IS&T Administrator: Yuri Lavadour, ext.4018, cell.817.456.4382

V.P. of IS&T: Robert Bernhoft, ext.5135, cell.254.396.2718

VENDOR-Daffron: office.800.325.0208, ext.199 if after hours, Only call if no other option is possible and the situation is an emergency.

Safety Contacts: These contacts may be needed if there is an accident of any type with an employee in service or any member of the public coming in contact with UCS property. Contact the individuals in the order below, by area first. The issue should be able to be resolved by either of the first two people in the list in most cases for any area.

For CLB, BUR, GBY: Mark Dixon, ext.5126 cell 817.648.5943, hm. 817.295.7887

For SVL, MER, PKL, GLR: David Stone, ext.6112, cell.817.269.3727, hm.254.968.2941

Chief Operations Officer/AGM: Marty Haught, ext.5223, cell.817.487.7009, hm.817.484.2582

Sr. V.P. Engineering: Quentin Howard, ext. 6127, cell.817.253.5406, hm.254.968.0917

Environmental Contacts: These contacts may be needed if special action is required for oil spills, etc. This request would usually be prompted by an operations employee. Contact the individuals in the order below. The issue should be able to be resolved by the first person in the list in most cases.

V.P. Cooperative Planning: Jared Wennemark, ext.5138, cell.817.648.5927, hm.817.426-0892

CEO/General Manager: Cameron Smallwood, ext.5222, cell.817.648.6515, hm.817.645.2133

BRAZOS ELECTRIC POWER COOPERATIVE, INC.
Debtor in Possession

Security Fence

In the event that United's security fencing has been compromised at any of its restricted access locations, the Director of Facilities is authorized to procure the services of fencing professionals to repair damaged fencing or install temporary fencing as conditions dictate.

To this end, the following is a list of preapproved vendors with contact information.

Buzz Custom Fence Company

Aledo Office
(817) 989-2600
Aledo, TX 76008

Cleburne Office
(817) 641-0080
Cleburne, TX 76031

Fort Worth Office

House keeping and office clean up process during an ERP event	Robert Sherman

Security Process for United's Bank Accounts

Current Security Practices for Bank Transactions

- Positive Pay system for all AP checks written from United accounts
 - United sends a positive pay file to Frost Bank with each check number and dollar amount listed. All checks must match both criteria in order for funds to be disbursed.
 - This process is also used for Member Dividends and Bonus checks through First Financial Bank.
- Proper identification and authorization required for First Financial Bank and Frost Bank wire transfers

Vulnerability in Wire Transfer Security

- In the event of a security breach where a wire transfer is attempted, the following steps are required to stop the transfer:
 - For First Financial Bank, an authorized employee will need to call the Wire Room at 866-627-7130 ASAP to cancel the transfer.
 - Also, if a wire is sent to a new beneficiary, First Financial Bank will call to confirm before the wire is approved to process.
 - For Frost Bank, an authorized employee can call the treasury management help desk at (888) 481-0336 between 7:00 AM and 6:00 PM, and the wire room department can be reached to see if the wire has been processed. If it has not been processed, then the wire can be stopped. However, Frost Bank cannot guarantee that the wire can be stopped if it has already run its course through the screening process in the wire department.

Key Account Representative- Back-up Plan

In the event that Key Account reps are not available, the Senior Field Engineering Representatives (Senior FER's) will be properly trained to assist with communicating to United's Key Accounts during times of need. Each Senior FER will be responsible for the specific area in which they represent and will be listed on the Key Account Database as a "back-up" contact. The Senior FER's at this time are:

Wes Burton- Burleson/Cleburne Operational Districts

Gary Sowders- Granbury Operational District

Denny Adams- Stephenville/Meridian/PK Operational Districts

Training

The Key Accounts/Business Development Manager will be responsible for both granting access to the Key Account database, as well as training each Senior FER on how to access and utilize this particular resource. Training will be performed annually, concurrent with the annual update of the ERP.

Recovery from Loss of Power at Key Facilities

For UCS, there are three Key Facilities: the Burleson Office, Cleburne office and the Stephenville office. Personnel, assets, etc. can be redirected from any other of UCS's three office facilities if necessary during a catastrophic event.

Burleson Office

The Burleson Office houses the majority of the Executive Staff as well as the key operations and planning groups. Therefore it is an essential office that requires power at all times. The office itself is fed from Timbergreen substation (UCS distribution service) and there is an automated source transfer switch installed that will allow the office to be automatically fed from High Point without service interruption during most events. For this reason, outages for Burleson Office are highly unlikely. However, if power is lost, the Burleson Office key operational areas are supported by a large UPS that will keep operation systems running for approximately 10-15 minutes. Within this timeframe, the automatic backup generator will start and begin powering those systems while backfeed options are being initiated by the operations group. The generator requires propane fuel for which there are several local vendors if the 500 gallon tank should need refueling.

Cleburne Office

The Cleburne office houses Executive Staff as well as key operation and warehouse groups. Therefore it is an essential office that requires power at all times. The office is fed from Tenaska substation (UCS distribution service) via an underground loop and can easily be fed from Keene substation with the operation of several distribution switches. Additionally, it can be fed from the Joshua 1 substation during low loading periods or with approval from the planning department. For this reason, long term outages for the Cleburne office are highly unlikely. However, in the event of an outage, the Cleburne office key areas are supported by a large UPS that will keep systems running for approximately 3-4 hours. Within this timeframe, either switching can be performed, or the trailer-mounted generator can be connected to the service transformer. The generator requires diesel fuel for which there are several local vendors.

Stephenville Office

The Stephenville office houses the majority of the revenue/accounting related functions of the cooperative; therefore it is essential to maintain power here as well. This office is served from the Selden substation (UCS distribution service) and has the capability to easily be served from two separate circuits connected to the Selden substation transformer with the operation of several distribution switches. Additionally, with some line switching, the office facility can be served from the Stephenville substation. Key systems at this office are supported by a large UPS for standby until the on-site generation unit picks up the load. The generator is LP gas for which there are several local vendors if the 500 gallon tank should need refueling.

Generator/UPS Testing

UPS testing should occur on a monthly basis at the Cleburne, Stephenville, and Burleson offices by the IS&T group with assistance of other groups as necessary. The Burleson and Stephenville Office generator exercises automatically every Monday and is monitored by Technical Services and maintained by Operations. The trailer-mounted generator housed in Cleburne is maintained and tested by Operations. Any problems should be brought to the attention of the Emergency Coordinator and resolved immediately.

Portable Generator Use at Other Locations

UCS has many smaller generators available for use at other locations, and one with the capacity to power an entire office building. In extreme situations one of these units may be needed at one of UCS's other locations. Use of the large trailer-mounted generator housed at Cleburne shall be done according to established guidelines. Use of the smaller generators for restoring service to OLTs shall be done according to established guidelines. If more generation is needed for local needs a vendor is as follows:

Contact: Clifford Power Systems
101 Industrial Blvd.
Mansfield, Texas 76063
24 hr toll free: (800) 324-0066
Danny Pruitt – Manager, 817-529-1801
Gary Bronaugh – 817-640-5544 24 hr dispatch

Updated: 1/24/2022

United Trailer-mounted Generator Set Guidelines

Overview

United owns a trailer-mounted diesel generator set that can be mobilized in the event of a power outage at any of the United branch offices, at selected member locations, or whenever temporary power is needed by United personnel. The generator provides electrical output in a range of three-phase and single-phase voltages to bus connections and receptacles. These guidelines will outline the specifications and procedures for operation of the generator.

Electrical Specifications

<u>Voltage</u>	<u>Phase</u>	<u>KW/KVA</u>	<u>Trip Setting (A)</u>
277/480	3	213/266	250
120/240	3	213/266	630
120/208	3	188/235	630
120/240	1	175/219	630

Storage

The generator set will be stored at the Cleburne office in the covered parking across from the warehouse. The trailer wheels should be chocked during storage and operation. The generator must be plugged into a 120 V outlet at all times to keep the battery charged and the engine block heated. To prevent discharge, the battery disconnect switch should be left in the open position (the battery will still charge). The generator should be stored full of fuel so it is ready for use. The generator doors should be locked and a set of keys are kept in Cleburne dispatch, Cleburne mechanics office, Cleburne Foreman's office and a set is kept by Senior Foreman

Transportation

Instructions for towing and parking the trailer can be found on pages 21-26 of the user manual and must be followed carefully.

Interconnection

The generator cannot be operated in parallel with another power source since the output cannot be synchronized. **It must never be connected to an energized distribution system.** The typical method for restoring power to a facility is to connect cables from the generator terminals to the distribution transformer secondary terminals serving the facility. An air break should be visible before connecting the output of the generator to the distribution network (i.e., primary elbows parked or overhead disconnect switches opened). Appropriately sized cabling should be used for connection of the generator to the load, taking into account the ampacity of the cable (see breaker ratings above) and the anticipated voltage drop. Where possible, the phase rotation of the facility should be identified in advance so the proper connections can be made. The generator terminals and cables should be labeled so that phase and rotation are easily identified. **The trailer chassis must be grounded to an 8 ft. embedded ground rod through a #6 Cu wire connected to the grounding lug on the frame.**

Operation

General instructions for preparation, starting, and running of the generator are found on pages 27-34 of the user manual. Instructions for voltage control are written on the control panel itself. Before starting the engine, make sure the voltage switch is in the correct position. **Do not switch the voltage while the generator is running.**

Metering

Prior to connecting the generator to a facility, the effect of the generator on metering at the location should be considered. Meter readings should be recorded before load is transferred to the generator and after it is restored to normal. The recorded readings should be reported to the Electrical Engineer.

Maintenance

The maintenance schedule for the generator set is based on hours of operation, as recorded on the generator's hour meter, and passage of time. Service intervals for standby operation can be found on pages 160-161 of the user manual. In particular is the requirement to run the generator for 30 minutes every two weeks *under load*. Detailed instructions for maintenance and servicing of the generator are found on pages 162-207 of the user manual. A generator maintenance record should be kept by those performing the maintenance.

Safety

General guidelines for safe operation of the generator set are found on pages 74-89 of the user manual. Additionally, standard United safety guidelines should be followed when working around potentially energized equipment, especially when interconnecting the generator. Where possible, knockouts should be used for making connections to pad-mounted transformers so that the cabinet may remain closed during operation of the generator. Barricading and flagging should be used where necessary.

Responsibilities

Interconnection and Operation of the generator will be under the direction of the Senior Foreman.

The Senior Foreman and dispatch will each have a copy of the user manual. Another copy of the user manual will be kept with the generator. A set of keys are kept in Cleburne dispatch, Cleburne mechanics office, Cleburne Foreman's office and a set is kept by Senior Foreman.

Fleet Mechanics are responsible for regular maintenance and fueling of the generator and trailer.

The Senior Foreman will conduct annual training on generator operation for appropriate personnel and the Electrical Engineer will provide technical assistance as required.
