20. CSWR-Texas demonstrated a compliance history that is adequate for approval of the sale and transfer.

Adequacy of Existing Service

21. Chaparral Water currently provides retail water service to 51 customer connections in the requested area.
22. Chaparral Water has active violations listed in the TCEQ database.
23. CSWR-Texas plans to make upgrades, renovation, and repairs to the public water system to address the violations and return the system to compliance.
24. The Commission's complaint records, which date back to 2017, show one complaint against Chaparral Water, which has been closed.
25. There is no evidence in the record that Chaparral Water has failed to comply with any Commission or TCEQ order.

Need for Additional Service

26. There is a continuing need for service because Chaparral Water is currently serving 51 water connections in the requested area.
27. This is an application to transfer only existing facilities, customers, and service area.
28. There will be no effect on landowners as the requested area is currently certificated.

Effect of Approving the Transaction and Granting the Amendment

29. Approving the sale and transfer and granting the CCN amendment will obligate CSWR-Texas to provide continuous and adequate water service to current and future customers in the requested area.
30. Because this application is to transfer only existing facilities, customers, and service area, there will be no effect on any other retail public utility servicing the proximate area.
31. There will be no effect on landowners in the requested area because the requested area is currently certificated.

Ability to Serve: Managerial and Technical

32. CSWR-Texas owns and operates several public water systems registered with TCEQ and does not have any active violations listed in the TCEQ database.

33. The Commission's complaint records, which date back to 2017, show 12 complaints against CSWR-Texas.
34. CSWR-Texas employs or contracts with TCEQ-licensed operators who will operate the public water system.
35. No additional construction is necessary for CSWR-Texas to provide service to the requested area.
36. CSWR-Texas has the technical and managerial capability to provide continuous and adequate service to the requested area.

Feasibility of Obtaining Service from Adjacent Retail Public Utility

37. Chaparral Water is currently providing sewer service to customers and has sufficient capacity. Therefore, it is not feasible to obtain service from an adjacent retail public utility.

Regionalization or Consolidation

38. It will not be necessary for CSWR-Texas to construct a physically separate water system to serve the requested area. Therefore, consideration of regionalization or consolidation is not required.
39. Because the requested area will not require construction of a physically separate water system, consideration of regionalization or consolidation with another retail public utility is not required.

Ability to Serve: Financial Ability

40. CSWR, LLC, the immediate parent company of CSWR-Texas, is capable, available, and willing to cover temporary cash shortages, and has a debt-to-equity ratio that is less than one, satisfying the leverage test.
41. CSWR, LLC provided a written guarantee of coverage of temporary cash shortages and demonstrated that it has sufficient cash available to cover any projected operations and maintenance shortages in the first year five years of operations after completion of the transaction and possesses the cash and leverage ability to pay for capital improvements and necessary equity investments, satisfying the operations test.

42. CSWR-Texas submitted documents indicating funds are available for the purchase of the system and facilities plus any improvements necessary to provide continuous and adequate service to the existing customers.
43. CSWR-Texas demonstrated the financial capability and stability to pay for the facilities necessary to provide continuous and adequate service to the requested area.

Financial Assurance

44. There is no need to require CSWR-Texas to provide a bond or other financial assurance to ensure continuous and adequate service.

Environmental Integrity and Effect on the Land

45. The requested area will continue to be served with existing infrastructure.
46. There will be minimal effects on environmental integrity and on the land as a result of CSWR-Texas's planned upgrades, renovations, and repairs to the water system.

Improvement of Service or Lowering Cost to Customers

47. Reliability and quality of water is expected to improve under CSWR-Texas's management.
48. The rates charged to customers in the requested area will not change as a result of the proposed transaction because CSWR-Texas will adopt the currently in effect tariff for the water systems upon approval of the transaction.

Maps, Certificates, and Tariffs

50. On March 30, 2023, the applicants filed their consent forms concurring with the proposed final map, certificates, and tariffs.
51. The final map, certificate, and tariff were included as attachments to the supplemental joint motion to admit evidence and proposed notice of approval filed on April 21, 2023.

Section 1.03 – Purchased Water and Sewer Adjustment Clause

Upon a notice from the City of Donna of a change in price in the cost of purchased water or sewer service, the Utility may (after notice has been given to the ratepayers and the Commission) adjust its rates in accordance with the Tariff provisions.

The adjustment to the utility's rate structure will be calculated as set for the below:

- I. Adjusted Monthly Minimum Charge – Current Monthly Minimum Charge + “A” + “B”

Where:

“A” = Change in Price of Purchase Water from the City of Donna---which is---{ Change in the monthly minimum Price divided by the number of customers} + {2 times the Change in Price per 1,000 gallons of water}

“B” = Change in Price of Purchased Sewer Service from the City of Donna---which is--- { Change in the monthly minimum Price of Purchases Sewer Service divided by the number of customers} + {2 times the Change in Price per 1,000 gallons of Purchased Sewer Service times 0.80}

- II. Adjusted Gallonage Charge = Current Gallonage Charge + “X” + “Y”

Where:

“X” = Change in Price per 1,000 gallons of Purchased Water from the City of Donna

“Y” = Change in Price per 1,000 gallons of Purchased Sewer Service from the City of Donna times 0.80

Change as used above is the algebraic summation of the Price imposed by the City of Donna subsequent to the date of this Tariff (New Price) and the Price existing on the date this Tariff was approved (Old Price), i.e. New Price minus Old Price.

Number of customers as used above is the number existing customers at the beginning of the period in which a Change in Price becomes effective.
