**Public Utility Commission
Docket 53719**

We do not need a 13.68% increase for Entergy this year. It is enough that gas/grocery prices are up phenomenally since the Democrats got in office. Most American families are hurting terribly in the pocketbook, residential accounts should not receive an increase, instead get those large Commercial Accounts and give them the 13.68% increase. The middle class is disappearing in this country. We need a break from some area, and with all the thousands of new luxury housing being built in Montgomery County, Texas, you don't need to give Entergy an increase, this county is being flooded with new residential business for them.

Enough is enough, give the increase to all commercial accounts only.

Thank you.
