Austin, Texas 78701

Re: Leap Letter of Interest for Addition to the ADER Task Force

Dear Commissioner Glotfelty,

Leapfrog Power, Inc. ("Leap") respectfully requests to be added to the Aggregated Distributed Energy Resource (ADER) Task Force, in response to your memo filed August 14, 2024. Leap is a demand response (DR) provider founded in 2017 that provides DR services to residential, commercial, industrial, and agricultural customers throughout the U.S., including in Texas, California, and New York. Through its technology platform, Leap enables distributed energy resources (DERs) to provide grid flexibility, delivering revenue to customers and integrating additional demand-side resources into the electricity system.

Leap is excited by the potential for the ADER pilot to strengthen integration of DERs in the Texas' electricity system, and it believes that its experience operating DERs in Texas and elsewhere can provide valuable insights as the Task Force develops a roadmap to ensure that Texas maximizes the contribution that these resources can provide to grid reliability.

Respectfully submitted,

A handwritten signature in cursive script that reads "Collin Smith".
