Austin, TX 78711

RE: Request to Participate in Project 53911, Aggregated Distributed Energy Resource Pilot Project

Dear Commissioner Glotfelty:

Hunt Energy Network, L.L.C. ("HEN") respectfully requests to be included as a Task Force member of the Aggregated Distributed Energy Resource (DER) pilot project. HEN is focused on building a network of distributed resources, which will include ESRs, peaking power, and customer onsite generation to help meet the explosive demand growth.

HEN and its affiliates develop, own, and operate 280MWs of distribution connected, fully dispatchable energy storage resources ("ESRs") and load resources. HEN operates a Level 4 Qualified Scheduling Entity (QSE) and is fully qualified to participate in the ERCOT energy and ancillary service markets. Additionally, HEN is focused on helping commercial customers fully utilize backup generation at their facilities to provide resiliency for the customer and participation in the ERCOT market when the generation is not serving the customer. Using its 24/7 operations desk and TraDER optimization platform, HEN can provide opportunities for commercial and industrial customers to receive full resilient back up power while also providing much needed resources to the ERCOT grid.

Respectfully Submitted

/s/ Pat Wood, III
