ConnectDER Notice of Intent to Participate

ConnectDER appreciates the opportunity to submit comments in response to the ADER Barrier/Improvement Workshops Proposal ("Workshops Proposal") filed on July 24, 2024, for Project No.53911. ConnectDER would welcome the opportunity to participate in the proposed workshops. ConnectDER is a manufacturer of Meter Socket Adapters with nearly a decade of experience bringing simple interconnection solutions to residential homeowners. We believe that we can contribute to the Workshop discussions by providing insights on best practices to benefit Texas customers. ConnectDER can particularly provide insights towards the following Workshop topics:

- Permitting and Interconnection Reviews Best Practices and Electric Only Standardization
- Meter Socket Adapters

ConnectDER respectfully requests to participate as a presenter on the topic of Meter Socket Adapters (MSAs). We look forward to discussing the equity and resiliency outcomes of MSAs and best practices in MSA policy and processes.

We appreciate the efforts of the ADER Task Force to enhance DER access for Texas residents and look forward to participating and coordinating with stakeholders in the upcoming Workshop. For any questions, please contact ConnectDER with the information provided below.

Respectfully,

Jonathan Knauer
