Base Power Company Statement of Interest

Base Power Company is pleased to submit this notice of interest to participate as a member of the Aggregated Distributed Energy Resource (ADER) Task Force, in response to Commissioner Glotfelty's memo¹ filed on August 14, 2024 in this Project, requesting such notices by August 30, 2024.

Base Power seeks membership in the Retail Electricity Provider segment. Base Power is an Option 1 REP in Texas. The company is also an installer and equipment provider of residential battery systems sized to provide grid services and long duration outage protection to its customers. Base Power's business model therefore allows for the company to engage with Texas residents on the complete life cycle of barriers and solutions impacting their desire for home resiliency batteries today.

Base looks forward to the opportunity to lead in the critical discussions that will help shape the future of distributed energy resources in Texas. We are grateful for the chance to contribute our insights and experience in support of enhancing the resilience and reliability of the Texas electric grid.

Thank you for considering our participation. We look forward to working alongside the Commission and Staff, as well other stakeholders in this important effort.

Sincerely,

Tori Villarreal
Head of Policy
Base Power Company
