Re: Project 53911 Aggregated Distributed Energy Resource ERCOT Pilot Project

Dear Commissioner Glotfelty,

In response to your memo filed in this project on August 14, 2024, Splight respectfully requests to be added to the Aggregated Distributed Energy Resource Task Force. In addition to its sensorless dynamic line rating technology, Splight has developed a transmission and distribution operating systems platform, whose capabilities include an advanced distributed energy resource management solution. Splight has strong experience managing Virtual Power Plants. We hope to be helpful in the ERCOT market discussions and also to learn more about the unique issues faced by the utilities and VPP providers. Please let us know if we can provide further information in order to facilitate our ability to participate on the Task Force.

Thank you for your consideration.

Best regards,

A handwritten signature in black ink, appearing to read "Robert J. King". The signature is fluid and cursive, with a large, stylized "R" and "K".
