**Sunnova Energy Corporation Letter of Interest**

**Introduction**

Sunnova Energy International Inc. (NYSE: NOVA) is an industry-leading adaptive energy service company. Headquartered in Houston, Texas, we serve over 403,000 customers in more than 50 U.S. states and territories, with over 28,000 customers in Texas. Sunnova appreciates the opportunity to present this letter of interest in joining the Aggregated Distributed Energy Resource (ADER) Task Force in response to Commissioner Glotfelty's memo dated August 14, 2024, which called for such notices to be submitted by August 30, 2024.

Sunnova is committed to the expansion of the ADER Pilot Project and is actively seeking membership in the ADER Task Force's ADER Providers segment. Our company offers a diverse range of distributed energy resource products, including solar energy systems, battery energy storage systems, dynamic electric load controllers, and energy-efficient HVAC systems. These products are designed to provide homeowners and businesses with a more cost-effective, reliable, and resilient power solution. We have a wealth of experience in providing services to multiple properties connected at the distribution system level, including those within the same subdivision. This experience gives us valuable insights into the issues the Pilot Project aims to address. Our active involvement in various aggregated DER programs nationwide further demonstrates our commitment to the expansion of the ADER pilot project.

We are excited to be part of shaping the future of distributed energy resources in Texas and improving the resilience of the electric grid. Thank you for considering us. We look forward to collaborating with the Commission, staff, and other stakeholders.

Thank you,

A handwritten signature in cursive script that reads "Jamie Charles".
