Re: Application for Critical Load Designation

To Whom It May Concern:

As required by SB 3, we are sending you a copy of the Application for Critical Load Designation that we filed with Trinity Valley Electric Cooperative (TVEC).

If you need further information, please feel free to contact us.

I look forward to receiving confirmation from you.

Thank you,

Kenneth Roberts
General Manager

TRINITY VALLEY ELECTRIC COOPERATIVE

Application for Critical Load Designation

This application should be completed to request designation as an account serving a critical load for public safety, critical infrastructure or electric generation.

Multiple premises may be submitted on a single form, provided that the information requested below is provided for each metered location.

This form applies only to TVEC accounts. A separate application must be submitted to each electric utility provider. TVEC may request additional information prior to implementing the critical load designation.

The member must provide any changes to customer or premise information as soon as is practicable. TVEC may request confirmation of the critical load designation and the customer must timely confirm that a premise previously designated as critical load continues to qualify for that designation.

DESIGNATION OF A CRITICAL LOAD DOES NOT GUARANTEE AN UNINTERRUPTED SUPPLY OF ELECTRICITY

It is the responsibility of the customer to make arrangements for alternative sources of electric power should a localized outage or significant load shed event occur.

COPY

Application for Critical Load Designation

Check the appropriate designation

- Medical Facility (Hospital, Emergency Room, Assisted Living Facility)
- Public Safety / Law Enforcement
- Public Safety / Fire Department or First Responder Facility
- Petroleum Pipeline or Facility
- Natural Gas Pipeline or Facility
- Public Utilities (Water Department, Wastewater Facilities, Telephone Communications)

Describe equipment or premise served:

STWSC operates a 1.5 MGD Treatment Plant and serves a population of at least 5,130. STWSC has 3 transfer pumps, CL2 pump, and multiple chemical pumps at the Raw Water Station alone. The water is then transferred to the Treatment Plant where STWSC runs pumps for various stages of the treatment facility including head tank, backwash, clear well, and transfer pumps to the Elevated Tower.

Does this facility serve electrical generation facilities?

No

Describe any existing electricity backup capability at this facility, including (1) the length of time the facility can operate without electricity from the utility and (2) the length of required time for start-up following a power outage:

STWSC has electrical backup capabilities at the Raw Water Station and the Treatment Plant. The Raw Water Station is equipped with a 80 kWh Kohler Generator and the Treatment Plant is equipped with a 400 kWh Mitsubishi Generator. We have 530,000 gallons of water in storage between the Elevated Tower and Ground Storage, which gives us approximately 16 hours of service, if the storage tanks are full, at peak time. We have a shared intake with two other water utilities at the dam on Lake Tawakoni and it takes 90 minutes of "startup time" from the Raw Water Station to the Treatment Plant to get water flowing again.

Return this form and supporting documentation to memberrelations@tvec.coop or fax to (972) 932-6466.

Messages From Trinity Valley

- ▶ Be sure to check out the local pages in Texas Co-op Power magazine for news and updates from TVEC, including efficiency tips, safety recommendations and Operation Round Up updates.
- ▶ Consider e-check or bank draft as quick and easy payment options that also help the co-op save money. As a nonprofit electric cooperative, anything we can do to reduce costs sends more money back to members as capital credits at the end of the year.
- ▶ Check out the "Consider it Hot" podcast from TVEC for the latest co-op news and information. Search for TVEC Consider it Hot in your podcast platform of choice or visit tvec.net/podcast and stay connected!
