OF RHOME IN WISE COUNTY	§	

RESPONSE TO ORDER NO. 18

Rolling V Ranch Water Control and Improvement District No. 3 ("RVR WCID No. 3" or "Applicant") files this response to Order No. 18, which requested documentation from Applicant to demonstrate the need for service in the requested area for Rolling V Ranch WCID No. 3 and the status of any capital improvements necessary to provide service to the requested areas.

I. Need for Service

By way of background, Applicant is one district that is a part of a five-district master planned development in which the Applicant is the designated Master District for operating the utility services for the other four districts that comprise Rolling V Ranch Water Control and Improvement District Nos. 1,2,4 and 5. A planning exhibit for the master planned development that shows all five Rolling V districts has been included with this filing as Exhibit A. The planning exhibit shows the district boundaries for the entire project that is Rolling V Ranch. The areas that are currently receiving service from the Applicant are depicted in Exhibit B attached hereto.

Rolling V Ranch Water Control and Improvement District No. 1 of Wise County ("RVR WCID No. 1") was created on September 1, 2007, by special act of the Texas Legislature codified as Chapter 9021, Texas Special District Local Laws Code. Rolling V Ranch Water

Control and Improvement District No. 2 ("RVR WCID No. 2"), as well as the Applicant were created on February 12, 2020, by division of RVR WCID No. 1 pursuant to a division election and Order that was adopted by RVR WCID No. 1. Rolling V Ranch WCID No. 3 held two division elections and Rolling V Ranch Water Control and Improvement District No. 4 ("RVR WCID No. 4") was created and then Rolling V Ranch Water Control and Improvement District No. 5 ("RVR WCID No. 5") was created in the second division election.

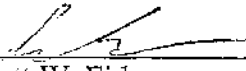

RVR WCID No. 1 and RVR WCID No. 2 are the initial phases of development buildout for the master planned development that is Rolling V Ranch. Builders have purchased lots and are currently constructing homes in RVR WCID No.1 and RVR WCID No. 2. The service agreements for the residents in RVR WCID No. 1 and RVR WCID No. 2 are attached hereto as **Exhibit C**. RVR WCID No. 3 executed Operating Agreements with RVR WCID Nos. 1,2 and 4 for the provision of utility service to the districts. RVR WCID No. 3 will execute the same form of Operating Agreement with RVR WCID No. 5. Section 4.2 of the Operating Agreements attached hereto as **Exhibit D** requires Applicant to provide water to the other Rolling V districts.

II. Capital Improvements Plan

RVR WCID No. 3 will complete a 16" water line from an elevation storage tank, the 3433-booster pump station, the distribution piping for groundwater wells, the ground storage tank, as well as the pump station and treatment facilities in 2024. The five-year projections and capital improvements plan is attached hereto as **Exhibit E**. A map showing where the facilities listed on the capital improvement plan will be located is attached as **Exhibit E-1**. The total projected costs for the facilities listed in the capital improvements plan is \$13,159,034. A lender letter from Vantage Bank on behalf of RVR WCID No. 3 in the amount of \$44,900,000 is attached hereto as **Exhibit F**. The lender letter from Vantage Bank meets the requirements of 16

Texas Administrative Code § 24.11(e)(5). In addition to the lender letter from Vantage Bank, RVR WCID No. 3's audit is attached hereto as **Exhibit G**.

Respectfully submitted,

By:

394-4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention

device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III.

Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the "Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II.

Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more that 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III.

repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the "Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

Return to via Email: StartService@inframark.com Fax- 281-394-4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System and _____ (the "Customer").

A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their

property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System. F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name: _____

4050 Summit Dr. #103 (Office will assign number) Austin, TX 78728 PH: 512-246-0498 FAX: 512-716-0024
SERVICE APPLICATION & AGREEMENT PURPOSE: REUNION RANCH WCID 1 is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this Service Agreement before we will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-

establish service unless it has assigned a copy of this Service Agreement. II. PLUMBING RESTRICTIONS : The following undesirable plumbing practices are prohibited by State regulations: A. No direct connection between the public drinking water supply and potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by installation of

fan air-gap or a reduced pressure zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. PLUMBING RESTRICTIONS: The following are the terms of the Service Agreement between: REUNION RANCH WCID (the "Water Provider") and (Customer Signature-

Required) III. The undersigned hereby makes application to REUNION RANCH WCID for water and wastewater services. We/I understand and agree that we/I will be responsible for all water and wastewater services provided to the property described in this application until such time as service to the property is disconnected in accordance with the Water Provider's Rules and Regulations regarding utility services. We/I agree to comply with the Water Provider's Rules and Regulations and to pay for all utility services rendered to the property in a timely manner and understand that a violation of the Rules and Regulations may result in a penalty and/or termination of utility service to my/our property. We/I represent that the information above is true and correct. SIGNED: _____ 2 House Bill 859 re

quires "government-operated" utilities to notify customers of their right to confidentiality. You have the right to request confidentiality of your personal information contained in our records. "Personal information" as defined by the statute means an individual's address, telephone number, or social security number. Please see Page 4 of this Agreement for the Confidential Agreement. IV. A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises is connected to the Water System. B. The Customer shall allow his property to be inspected for possible cross-

connections and other unacceptable plumbing practices. These inspections shall be conducted by the District or its designated agent prior to initiating new water service; when there is reason to believe that cross-connections or other unacceptable plumbing practices exist; or after any major changes to the private plumbing facilities. The inspections shall be conducted during the District's business hours. C. The Water System shall notify the customer in writing of any cross-

connection or other undesirable plumbing practice which has been identified during the initial inspection or the periodic reinspection. D. The Customer shall immediately correct any undesirable plumbing practice on his premises. E. The Customer shall, at his expense, property install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System. V. ENFORCEMENT: If the Customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the Customer. Do you have any of the following: _____

Irrigation System, _____ Pool, _____ Hot Tub, _____ Water Softener, _____ None You must notify Inframark if any of the above are installed after move in. If any of the above are noticed at time of turn on, Inframark will not turn on services until all requirements are met. As Owner/Tenant of this property, I understand that I am responsible for payment of all fees and charges related to services rendered to the property and agree that service to the property is subject to compliance with the District's Rules and Regulations. I further understand and agree that the knowing submission of false information on this application can result in disconnection of water and wastewater services. 4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking

water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System and _____ (the "Customer").

A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. 394-4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention

device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III.

Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the "Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:
