

drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III.

Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the "Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System. F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II.

Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or

repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the "Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name: _____

4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted.

These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System and _____ (the "Customer").

A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System. F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

4530 I. Purposc: The Water system is responsible for protecting the drinking water

supply from contamination or pollution which could result from improper plumbing

practices. The purpose of this Service Agreement is to notify each customer of the

plumbing restrictions which are in place to provide this protection. The District

enforces these restrictions to ensure the public health and welfare. Each customer

must sign this agreement before service will begin. In addition, when service to an

existing connection has been suspended or terminated, the District will not re-

establish service unless it has a signed copy of this Service Agreement. II. Plumbing

Restrictions: The following undesirable plumbing practices are prohibited by State

regulations. A. No direct-connection between the public drinking water supply and a

potential source of contamination is permitted. Potential threats to the public drinking

water supply shall be eliminated at the service connection by the installation of an air-

gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System and _____ (the "Customer").

A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. 4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. B. No cross-connection between the public drinking water supply and a private water system is permitted.

These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III. Service Agreement: The following are the terms of the Service Agreement between the Water System and _____ (the "Customer").

A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System. F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

Service Agreement

OFFICE USE ONLY: CUSTOMER ACCOUNT #60302- ROLLING VALLEY
RANCH WCID #2 SERVICE AGREEMENT *Service

Address _____

*City _____ *Zip Code _____

*Mandatory field Return to via Email: StartService@inframark.com Fax- 281-394-4530 I. Purpose: The Water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this Service Agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before service will begin. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this Service Agreement. II. Plumbing Restrictions: The following undesirable plumbing practices are prohibited by State regulations. A. No direct-connection between the public drinking water supply and a potential source of contamination is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention

device. B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device. C. No connection which allows water to be returned to the public drinking water supply is permitted. D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use. E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. III.

Service Agreement: The following are the terms of the Service Agreement between the Water System

and _____ (the

"Customer"). A. The Water System will maintain a copy of this Service Agreement as long as the customer and/or premises are connected to the Water System. B. The customer shall allow their property to be inspected for possible cross-connections, after any major changes to the private plumbing facilities or if any unacceptable plumbing practices exist. These inspections shall be conducted by the Water System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours. C. The Water System shall notify the customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or periodic inspections. D. The customer shall immediately correct any undesirable plumbing practice on the premises. E. The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System F. Customer understands and agrees that the district does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time. IV. Enforcement. If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the customer. Print Name:

_____ Signed:

_____ Date: _____ Confidentiality Agreement Chapter 182 of the Texas Utilities Code as amended in 2021 by House Bill 872 provides that a

government-operated Municipal Utility District may not disclose personal information (customer's address, telephone number, and social security number) in a customer's account, or any information related to the volume or units of utility usage or amounts billed or collected for such utility usage, unless the customer elects to allow such information to be disclosed. The Utilities Code requires the District to provide notice of the customer's right to allow disclosure of his or her information. Therefore, if you wish to allow disclosure of your personal information, please check the box below and return this form to the District. NOTE: The District is allowed to disclose information in a customer's account record to federal, state or local government officials; to District employees, officials and operations personnel; to consumer reporting agencies; to a contractor or subcontractor approved by and providing services to the District, the state, a political subdivision of the state, or the United States; or to any other provider of utility services.

Authorization to Disclose Customer Information The undersigned customer allows the District to disclose the customer's account information and personal information as identified by Texas Utilities Code. By: Signature Date
