Jess,

Below is a public comment from a constituent who had trouble submitting a public comment so I am passing this along to you in hopes their public comment can be received.

Thanks,

Grant McLoughlin | General Counsel & Legislative Director Office of State Senator Lois W. Kolkhorst Chair, Senate Committee on Health & Human Services Capitol Office GE.4 | 512-463-0118 [kolkhorst.senate.texas.gov](mailto:kolkhorst.senate.texas.gov)

PUC comments

**Message:**

The procedure to make a comment to PUC is too complicated so please forward my info to the Peter Lake or whoever would receive these comments. And make it easier to file a comment!

Based on information published in the Houston Chronicle I am protesting the adoption of Peter Lake's plan to fix the grid. His plan depends too much on fossil fuels and only brings more profit to special interests who have courted the current politicians, including Greg Abbott. I voted against Abbott in the latest election due to his loyalty to fossil fuel producers. Such blind obedience may be helpful in the short term but we are headed for serious consequences. We CANNOT ignore global warming/ climate change! We need to take serious steps now! Don't ignore the evidence. In my own yard I see the effects we are having on all plant life, animal life and weather. I hate the intense weather we are experiencing. We need to fix this. Invest in battery storage for extreme conditions that we are enduring more and more frequently. Do not implement the Performance Credits Mechanism! It does not address energy efficiency, the climate crisis or account for future extreme weather conditions due to climate change. Citizens cannot afford more costly electricity. And more people will die in outages.
