Performance Credits Mechanism

My Opinion on the Performance Credits Mechanism being presented by the PUC and ERCOT, the Texas Electric Grid Operator.

If PUC and ERCOT said this is what their Proposing to make the grid more reliable and hardened

For all Texans, go for it, "Let's Roll"

Being ERCOT does not have mandate power, which these old, tired Bones find it confusing.

If your tasked to operate Electric Power to 27 million plus Texans, you should have a say in the operations.

When, Will, a Texan from birth for 71 years wakes up in the morning. He only wants a hot pot of coffee on, and wants to sit in his warm dining room, looking out at the snow falling softly to the ground. And thinking this makes everything all worth it.

When Will was young 1950's and 1960's, he would get up in the morning as a youngster, flip on the thingy on the wall, and the room had light. The only thought on his mind was to get dressed, and gather his baseball, Glove, and Bat and head to the sandlot to play his favorite pass time Baseball.

What ever you do, please keep Texas Will and All Texans on your mind.

Thanks and Good Luck Will (aka Youngster/Old Timer)
