Check the box or boxes that describe the allocation method used to bill tenants.

1. Occupancy method: The number of occupants in the tenant's dwelling unit is divided by the total number of occupants in all dwelling units at the beginning of the month for which bills are being rendered.

| Ratio occupancy method: | | Number of Occupants for |

| retail public utility's billing period. | | _ |

consumption is allocated using the occupancy method checked above. The remainder is allocated according to either:
