After looking at CSWR-Texas, the Company proposed rate increase. I found that their base rate was \$54.03/month or \$648.36/year without using a drop of water. In addition to high base rate the Company is requesting more than doubling the per 1,000 gals rate from \$2.25/thousand to 5.53/thousand. The proposed rate of 81.68/5thousand is more than 156% of the Lake Limestone water rate per 5,000 gals. An increase ~~of~~ of 156% seems exorbitant in my opinion.

I am not opposed to them getting a rate increase, but I would hope for a realistic rate increase. Thanks for letting me express my opinion.

Respectfully,
