RE: Tariff Control No. 54680 – *Application of Aqua Texas, Inc. for 2022 True-up Report and Pass-through Gallonage Charge for its Southwest Region*

On February 23, 2023, Aqua Texas, Inc. (Aqua), a Class A water utility, filed an application to implement its Southwest Region Regional Pass-Through Gallonage Charge True-up Report (True-up Report) for the completed 2022 calendar year under Certificate of Convenience and Necessity (CCN) No. 13254 and 13203. Aqua requests approval for a change to \$1.3932 per 1,000 gallons, effective March 1, 2023. The change represents a decrease of \$0.1045 per 1,000 gallons from its present charge. The True-up Report affects certain customers within its Southwest Region and one public water system that is now within its Southeast Region, the Brentwood Subdivision water system.

I have conducted an administrative review of the application and notice. Based upon my review of the initial application and supplemental information filed on February 23 and February 27, 2023, and March 21, 2023, I recommend that the application be deemed administratively complete. I recommend that the notice to affected customers be found sufficient and in compliance with 16 TAC § 24.25(b)(2)(F).
