I am writing to ask that Oncor not be allowed to put their lines behind our house on the greenway. I have been sick for years with chronic pancreatitis and needed some solitude. When we finally found this house we were told nothing would be built behind us. This was the house I was looking for a feel for the country but close to hospitals, peace and quiet with wildlife nature. We built a pool with fountains so I could sit back there and feel like I was in nature and putting these lines in takes that all away from me. I have also been blessed with neighbors that have had the same idea as me with the serenity and country living. They all keep up their yards and most of us do it on the same day so the rest of the week we can enjoy the peace and view. I can't imagine having some lines out there that I know are unhealthy for people in general. No matter what Oncor states or what studies that have been done I will never believe living next to these lines will not cause some kind of health risks. Being sick and in so much pain makes me realize how important peace and nature can be to help keep a positive outlook on life. Having neighbors that have the same value and same principles doesn't happen in most people's lifetime. For me even though this house might have been more than my husband and I wanted to spend it was worth it for my health and our family. So having the advantages of the beauty, wildlife and great neighbors I believe it will tear down our neighborhood. People will start moving because of health concerns, the noise it brings, the ugliness of the view and the loss of wildlife. I state moving because once these lines are put in or people find out about the lines being put in, the value of our properties will go down. How fair is that to those of us that spent more money for what we thought we were getting. It completely destroys me knowing they don't have to put it in our backyard, the city doesn't even want it here. There are other options best suited than this small town of Justin and I would just love for Oncor to listen to some of the customers that have brought them billions of dollars in their pockets and hear us. Move 2 miles up the road where there aren't houses already built, we don't have the kind of money this company has to just up and move and find a house like the one we live in today. Times have changed, economy has changed, we will never be able to find a house like ours somewhere else for the price we paid. Please listen to your customers, to the community and plan to put your lines elsewhere. I'm sure my letter will be skimmed over or put in a pile of all the other complaints but to whomever reads this, thank you for your time and I hope you relay all of our objections. I know they had a meeting where Oncor didn't show up and it was a big disappointment to the community, but this is why the letters are so important. I am also attaching a picture of the view of my house so you can see what I am talking about and why we are fighting so hard.

Have a nice day,

Donna Berry
