As residents of Canyon Falls for seven years, we are concerned about and wanted to give our input regarding the possible routes of Oncor transmission lines. Below are several of our concerns:

1. The effect on the Green Belt and natural areas of our community. Construction and operation of transmission lines disrupting or fragmenting the habitats of wildlife (coyote, bobcats, deer, rabbits, snakes, birds etc.) and plants.
2. Transmission lines, as proposed, will negatively affect the scenic beauty of Canyon Falls and our natural areas, as well as diminishing the appeal of our high value development.
3. The presence of additional transmission lines in Canyon Falls can affect our property values causing financial loss for homeowners. Potential home buyers will be deterred from purchasing new or resale properties near transmission lines due to concerns about health risks, aesthetics or perceived negative impacts on quality of life.
4. We also have concerns that transmission lines in Canyon Falls would be a health risk, due to exposure of electro-magnetic fields generated by the lines. The uncertainty surrounding the risk has created anxiety and apprehension among the residents.
5. We respectfully ask Oncor to avoid putting transmission lines on Green Belt routes C7, C8, C9, E5, E8, F3, and C9. We would encourage Oncor to replace segment C7 with C6 along 1171.

Thank you for your time and consideration.

Sincerely,

Richard and June Limato
