Re: Control Number 55067

Pursuant to the proposed location of the Ramhill-Horn Dunham transmission line, I urge this plan be relocated to an area with minimal impact to home and landowners and communities. There are multiple communities who risk significant impact to health and safety should this proposal be deemed appropriate. The severity of this plan and its negative consequences are many. This community humbly requests this plan be transposed to an area less likely to face a complexity of challenges and hurdles to protect the growing areas of Justin families and children as well as the rural areas consisting of livestock and agriculture.

Respectfully,

Tiffany Notley-Cain
