To Whom This Concern.

My interest in this docket qualifies me as an intervenor.

I am intervening and voting against this Oncor PUC Docket No. 55067. This would be located directly near our property. Justin citizens will not receive their electricity through these lines. So, why run them through our neighborhood, within 250 feet of my property?

Our property value here will be reduced by 30%. The financial and physical space for Justin and its residents will be negatively impacted. With the size of the Oncor project requiring a one-hundred-foot-wide clearance, trees, and other environmental aesthetics will be removed permanently. What about the Justin Town Square Project?

My daughter recently had cancer surgery in addition to some esophageal and asthma issues. I have many health complications and every breath is precious to me at this age. Why compromise our health? I want my neighbors and me to walk safely in our neighborhood with no fear or sight of that equipment. Why not run it under the ground? Do you have any idea how unsightly it is? Would you want it in your neighborhood, devaluing your property? The kids' park is in the same area you want to run this electrical equipment. What are the risk factors from a management point? Can you guarantee that everything will go right? Over time these things become uglier.

People have a hard enough time trying to make it in this world today. They can't just pick up and move to a nicer or prettier neighborhood. We work together to keep our neighborhood safe and nice. We don't want that hardware contraption near us. It is not helping us at all. Use some other undeveloped land.

I am not in favor and asking that you do not proceed with these plans.

Thank you,

Donella Wheeler
