Subject: Opposition to Proposed Power Lines in Canyon Falls (Segment C5 and C8)

Dear Sir/Madam,

As a concerned homeowner, mother, and resident living near the planned power line route (Segment C5 and C8) in Canyon Falls, I am writing to express my strong opposition to this proposal. I believe that installing power lines in our community will significantly negatively impact our health, environment, wildlife, and property values.

The proximity of the power lines to our homes and the cherished greenbelt, clubhouse, and trails in our community is worrisome. I am deeply concerned about the potential health risks associated with electromagnetic fields (EMF) and the noise pollution that might arise from their operation. As a mother, the safety and well-being of my family are of utmost importance, and I cannot stand idly by while this project may jeopardize it.

Moreover, introducing power lines near our properties will undoubtedly mar the natural beauty of Canyon Falls, which attracted many of us to invest in this community. This could lead to a decline in property values, impacting our financial investments and the overall appeal of living in this area.

I request the Public Utility Commission of Texas to carefully review the proposed power line route and consider the concerns raised by the residents of Canyon Falls. It is vital to explore alternative options that have less impact on families, the environment, and the community's well-being.

I trust that the Commission will take our perspectives into account during the decision-making process and ensure that our voices are heard. Your attention to this matter is greatly appreciated, and I hope that you will act in the best interest of the residents and the environment.

Thank you for your time and consideration.

Emily Valdez
