Application of Oncor Electric Delivery Company LLC
for the Ramhorn Hill to Dunham 345 KV Transmission Line

PUC of Texas Docket #55067

Justin Paul Butler
12771 Helen Rd
Justin, TX 76247
Statement of Position

I Justin Butler own land that is adjacent to link M8. I object to Routes 1, 65, 67, 68, 69, 72, 96, 142, 143, 191, 192 (*Optional*) but do not object to Route 179 which is the Oncor proposed route.

I oppose any route with link M8 for the following reasons:

- 1) The proposed routes including M8 do not follow accordance to the practice of Prudent Avoidance in the fact that there are a significant number of residents that will be directly affected by this proposed route. In addition, the proposed route including M8 does not follow property lines as in dictation by the standards of the PUCT.
- 2) Next, as a cancer survivor and auto-immune disease fighter there are numerous concerns of the direct impact of the Electromagnetic fields that will be transmitted from the transmission lines that can and will negatively impact my health. This would be amplified with the proximity of the proposed routes that include M8, and most likely worsen my condition.
- 3) In choosing our residence, it was a stout consideration to move out of the heavily populated areas as to give our children a place to grow up with the ability to learn and enjoy the outdoors with less population and impacts that urban life burdens its citizens with including but not limited to industrial development. Incorporating M8 into our lives destroys and devalues our quality of life by creating undesired environmental health concerns, displacement of wildlife, and overall enjoyment of rural life.

In closing, I would like Oncor to heavily consider routes that do not directly impact the vast number of residents that have intentionally chosen "home" in a rural location away from "urban" type development. The construction of these transmission lines would put "urban" development just off our porch steps.

Sincerely,

JButler
