Application of Oncor Electric Delivery Company LLC  
for the Ramhorn Hill to Dunham 345 KV Transmission Line

PUC of Texas Docket #55067

Shelly Rae Butler  
12771 Helen Rd.  
Justin, TX 76247

Statement of Position

I, Shelly Butler own land that is adjacent to link M8. I object to Routes 1, 65, 67, 68, 69, 72, 96, 142, 143, 191, 192 (*Optional*) but do not object to Route 179 which is the Oncor proposed route.

I oppose any route with link M8 for the following reasons:

- 1) The proposed routes including M8 do not follow accordance to the practice of Prudent Avoidance in the fact that there are a significant number of residents that will be directly affected by this proposed route. In addition, the proposed route including M8 does not follow property lines as in dictation by the standards of the PUCT.
- 2) Next, as a mother and elementary educator, I have various concerns of learning and developmental impacts on young children. There are numerous studies validating the negative impacts of electromagnetic fields in children's development from learning disabilities, human growth and development, and health developmental concerns.
- 3) When we decided to move to our current address, we strived to find as much of a country setting that we could and make significant commutes for our careers. This provided us the ability to raise our children in a "country" environment where outdoors is a significant part of life. With an EM transmitting device just off our property, this severely impacts our ability to do so.

In closing, I would like Oncor to heavily consider routes that do not directly impact the vast number of residents that have intentionally chosen "home" in a rural location away from "urban" type development. As a mother, wife, and loving child educator, I plead that other routes are chosen to not destroy ours, our children's, and other children's opportunity to grow and develop without a developmental and cancer-causing powerline in our area.

Sincerely,

*Shelly Butler*
