My wife and I purchased 1451 Oliver Creek Lane in Justin Texas two years ago as our dream home. Never even considering once that Oncor Electric would consider putting two 175' electric pole holding 2-345v high volt lines and other lines through our beautiful community pond/drainage ditch right next to our new house. This community pond is very important to our community. The pond is home to large fish, waterfowl, coyote and other wildlife. This pond acts as a storm drain as we do not have storm sewers. This pond/storm sewer can get pretty high (flood zone) in the Spring and we can't have these huge poles in our drainage ditch and pond.

Just about every resident that live in our community moved to this area to get away from heavy traffic and utility lines. Many of us have medical issues such as heart problems and heart surgery, Pacemakers, auto immune disease that are affected by high electric voltage. Many of our residents will be forced to move away from that much high voltage to keep their health.

The fact that Justin is a blossoming city, just getting their growth. There are many new plans in the making that can't have unsightly huge lines. These particular lines don't even benefit from these lines.

The city of Justin Texas is quite a tiny area of about 2.5 miles. We are now a "Tree City" to beautify our city only to find out many of the trees and park trees must be cleared for these lines.

The fact is this will ruin the very thing we are trying to do here in Justin.

There are several options that are Oncor wouldn't even consider for some reason and even made turns to move toward our little city.

Please do not allow Oncor to ruin our city just because we are small and didn't have a lot of money to fight this with a lot of attorneys in the early stages. Allow us to grow our little country city and make it a safe and fun for everyone.

Thank you for your consideration,

Kimn & Terri Nierman
