Dallas, TX 75202

Public Utility Commission of Texas

1701 N. Congress Avenue

P.O. Box 13326

Austin, TX 78711-3326

To PUC Commissioners Kathleen Jackson, Will McAdams, Lori Cobos, Jimmy Glotfelty, and others whom it may concern,

My name is Jeff True. My wife Karen and I live at 1105 Coralberry Dr in Canyon Falls, Laurel Division, where we purchased in January after an exhaustive search in this area.

The Oncor transmission lines pathways proposed include a route (E8) that runs directly behind our home. This area behind our home is an open and hilly pasture that is not suitable for home construction, is a natural watershed area for the Graham Branch and is one of the main reasons we love the home and its location. The open space is an asset that can never be replaced once destroyed. It's a reminder that we are still in Texas and that private property values and quality of life are a priority. We strongly oppose the destruction of this area with the intrusion of monstrous galvanized steel and humming electrical lines literally on top of our home, and the homes of others.

The pathways of E2, E3, C7, C8, C9, and E5 do similar damage to similar open and green space areas that were created precisely for the positive effects on the quality of life that my family and I enjoy and have invested in. We vehemently oppose the deliberate destruction of such an optimal community and its natural resources simply because it is the path of least resistance.

The delivery of electrical power is a responsibility that must be shouldered with the recipients of that power in mind. The destruction of property values that will occur from the installation of giant transmission lines permanently scarring the landscape, the reduction in the quality of life with noisy and health-averse power lines, and the disregard for the aesthetic that generates long term, life values for residents of this area cannot be dismissed by Oncor or the PUC.

Please find an alternate route(s) that preserve this community value and hi quality of life.

Sincerely

Jeff and Karen True
