Couldnt figure out your
System

We have fought since the beginning of hearing Oncor's plan to invade our housing development. Sending response letters, going to the Oncor's representative meetings and talking to people involved in making their decisions before giving the community a chance.

Being unable to finish the race with this technical part was depressing. You lost us near the end. My husband had a stroke and I am shy in front of higher ups who know everything. Sorry for my venting.

And having the money to hire a man who rebutted all of the simple people and their concerns. How disparaging! I have been crying inside and outside. But you could care less. forgive me.

We had plans to be near family and stay here awhile. This small town of Justin with a small community of nice families who cared about one another. All will be lost! Which you say "Who cares" right?

OK, we lose 30% on our house when we go to sell. But no. We can't sell for 8 mo - 1 yr or never. More like can't sell or lose 30%

You have all been through this kind of situation so you all know how it feels - right?!
1763

Do you or any of you in this business have to have your properties invaded by high voltage towers? Did you have to leave in the most stressful of situations? We are very responsible for all of our decisions. I would think about it. I should really take this year of 2023 and take most of my life this year to make a super good decision. Ashamed is the way you should feel! You who do not care. So proudly you speak against the simple minded.

We are so small next to you, Oncor: Puct
It is very rewarding to all of you. Told you have your richness for a time on Earth but not forever. Death comes and the end of your earthly riches.

Ps 24:1 The earth is the LORD'S, and the fulness thereof; the world, and they that dwell therein.

Held accountable for every wrong decision or motive.
Says God
