I wish to protest the transmission lines running through or around Canyon Falls. Everyone that I have told is in shock; because they all believe that transmission lines go up in older neighborhoods. No one can believe that they would install transmission lines in a new neighborhood that is developing, growing, & appreciating so quickly in value! The transmission lines could ruin the area quicker than it has taken to build up! Family & friends have said they would not pay the high HOA costs for a community with transmission lines throughout. Transmission lines lower the property and home value! They make a home/property harder to sell! During the time of installation seems to be the worst time to sell! I imagine it would not be a quick install! My wife and I are seniors and cannot make another move. We downsized over three years ago to our forever home in Laurel Village of Canyon Falls Community. We were hoping to leave a beautiful home that appreciated in value for our three children to sell as their inheritance. With the transmission lines in our immediate area, we will be lucky if they can sell our home for what we paid for it.

The night sky, beautiful sunsets, and topography of the land will be forever blocked by the huge ugly poles and wires. For the past three years, we have gone out and appreciated these on an almost daily basis. The transmission lines would put an end to the beauty of all three! We also enjoy knowing that wildlife will sometimes appear! That would change drastically during the installation of the lines! The lines may also change that permanently. This is so upsetting!

Please consider another route for the transmission lines so that we don't have to lose our hard-earned money! This should not be allowed! I am sure you, anyone for that matter, would feel violated if a company were to come into your neighborhood with something that affected the value, beauty, surroundings, and nature in a completely negative way such as the way the transmission lines will affect us!
