I hope this email finds you well. I am writing to bring attention to the potential negative consequences associated with the proposed ONCOR transmission line routes E5, C5, C7 and C9. I strongly believe that considering alternative routes, specifically C3, C6, and E6, which are closer to the road, would be more beneficial in addressing the concerns at hand.

The current proposed transmission line routes E5, C5, C7 and C9 could significantly impact our community, with potential long-term implications for our residents' well-being. I kindly request that you carefully evaluate and explore alternative routes, considering options closer to the road, such as C3, C6, and E6.

By opting for an alternative route that is in closer proximity to the road, we can mitigate many of the potential adverse effects associated with the current proposals. This approach not only addresses the concerns raised by our community but also safeguards the integrity of our surroundings and protects property values. Moreover, a route closer to the road strikes a favorable balance between transmission infrastructure requirements and our community's commitment to preserving our natural environment.

In light of the above, I respectfully request that the Public Utility Commission of Texas reevaluates the proposed transmission line routes, giving serious consideration to options such as C3, C6, and E6. It is crucial to prioritize the interests and well-being of our community while ensuring the successful establishment of the necessary transmission infrastructure.

Thank you for taking the time to consider my appeal. I trust that the Public Utility Commission of Texas will thoroughly assess the potential impacts of the transmission line routes and make a decision that reflects the best interests of our community as a whole.
