Please check one of the following:

- ☒ Other. Please describe and provide comments. You may attach a separate page, if necessary. _____

I own a hanger and aircraft at Northwest Regional Airport (52F). This is a privately-owned, public-use airport with over 600 aircraft based here and more than 100,000 general aviation operations annually. Link E6 poses significant hazard and risk to flight operations departing and arriving especially at night or with mechanical or weather issues. It would be of great benefit to see Oncor utilize the modified height (short) structures they have previously said could be constructed.
