Shaded values represent the shortest and longest distance between a habitable structure and a link within a group route subset

* Direction represents the distance beginning from the habitable structure towards the provided link.

† To account for photographic interpretation limitations such as shadows, tree canopies, and horizontal accuracy of the photography, Half identified all habitable structures within a measured distance of 520 feet of the alternative route centerline.

Shaded values represent the shortest and longest distance between a habitable structure and a link within a group route subset.

* Direction represents the distance beginning from the habitable structure towards the provided link.

† To account for photographic interpretation limitations such as shadows, tree canopies, and horizontal accuracy of the photography, Half identified all habitable structures within a measured distance of 520 feet of the alternative route centerline.

Shaded values represent the shortest and longest distance between a habitable structure and a link within a group route subset.

* Direction represents the distance beginning from the habitable structure towards the provided link.

† To account for photographic interpretation limitations such as shadows, tree canopies, and horizontal accuracy of the photography, Half identified all habitable structures within a measured distance of 520 feet of the alternative route centerline.

Shaded values represent the shortest and longest distance between a habitable structure and a link within a group route subset.

* Direction represents the distance beginning from the habitable structure towards the provided link.

† To account for photographic interpretation limitations such as shadows, tree canopies, and horizontal accuracy of the photography, Half identified all habitable structures within a measured distance of 520 feet of the alternative route centerline.

Application of Oncor Electric Delivery Company LLC to Amend its Certificate of Convenience and Necessity for the Ramhorn Hill Switch – Dunham Switch 345 kV Transmission Line in Denton and Wise Counties, Texas

PUBLIC UTILITY COMMISSION OF TEXAS DOCKET NO. 55067

Landowner

This notice is provided to notify you that Oncor Electric Delivery Company LLC (“Oncor”) has applied to amend its certificate of convenience and necessity to construct, own, and operate a new double-circuit 345 kV transmission line on triple-circuit capable structures between the proposed Ramhorn Hill Switch and the proposed Dunham Switch. The structures will have two 345 kV circuits initially installed with a vacant third circuit position capable of accommodating a future 138 kV circuit.

The proposed Ramhorn Hill Switch will be located approximately 2 miles south of the intersection of United States Highway (“US”) 287 and State Highway (“SH”) 114 near Rhome, Texas. The proposed Dunham Switch will be located approximately 1.4 miles southeast of the intersection of US 377 and Farm-to-Market Road (“FM”) 1171 (regionally known as Cross Timbers Road) in Flower Mound, Texas. The length of the Proposed Transmission Line Project is approximately 20 to 23 miles, depending on which route is selected by the Public Utility Commission of Texas (“PUC”).

Your land may be directly affected by this docket. If the applicant’s route is approved by the PUC, the applicant will have the right to build a facility that may directly affect your land. This docket will not determine the value of your land or the value of an easement if one is needed by the applicant to build the facility. If you have questions about this project, please contact Chris Reily of Oncor at (214) 486-4717.

A detailed routing map may be reviewed at the following locations:

Please read this brochure carefully. The brochure includes sample forms for making comments and for making a request to intervene as a party in this docket. ***The only way to fully participate in the PUC’s decision on where to locate the transmission line is to intervene in the docket. It is important for an affected person to intervene because the utility is not obligated to***

keep affected persons informed of the PUC's proceedings and cannot predict which route may or may not be approved by the PUC.

In addition to the contacts listed in the brochure, you may call the PUC's Customer Assistance Hotline at (888) 782-8477. Hearing- and speech-impaired individuals with text telephones (TTY) may contact the PUC's Customer Assistance Hotline at (512) 936-7136 or toll free at (800) 735-2989. The PUC must receive a letter from you requesting intervention by that date if you choose to intervene. The request to intervene form is included with your brochure.

The preferred method for you to file your request for intervention is electronically. If you decide to file a request for intervention, you will be required to serve the request on all other parties by email. Therefore, please include your own email address on the intervention form. Instructions for electronic filing via the "PUC Filer" on the PUC's website can be found here: <https://interchange.puc.texas.gov/filer>.
