Opposition of Proposed Route for Oncor Transmission Line – Ramhorn Hill – Dunham 345 kV Project

My name is Julie Gollihar and I live in the Liberty Trails community along highway 114 in Justin, TX. The proposed line would run directly behind my home, causing my property value to lower, as well as creating an eyesore and noise pollution.

I am an elementary teacher and purchased this house as a first time homebuyer on my own last summer. I was extremely happy to be able to buy this home, partially due to the beautiful view from my backyard. I currently have an unobstructed sunset view from my porch, which I often enjoy in the evenings and would be crushed to lose. Building a power line behind my home will also lower the value of my property, which would be extremely detrimental to me when I choose to move in the future. As a single woman on a teacher's salary, a decrease in home value would put a significant strain on my ability to move to a nicer home in the future.

There are also other proposed routes which would go through currently undeveloped land, avoiding neighborhoods altogether. This would be the best option so as not to upset and disturb current taxpayers and residents.

Please reconsider the placement of the power line to avoid the Liberty Trails community.

Thank you for your consideration,

Julie Gollihar
