Oncor,

I am a current resident in Justin, TX. My husband and I recently built a house on a lot that was \$20k extra because of the incredible view and privacy of the backyard. We have already dealt with so much construction issues and now we find out that Oncor wants to ruin our peaceful and private backyard to build these gigantic power lines instead. I'm sure you can imagine the frustration and disappointment we have as a family who just built a house and started a family. The last thing we want is power lines running through our backyard. There is a lovely park that so many people utilize that will be impacted by these power lines. The City of Justin proposed an alternative option, please strongly consider it for the sake of the town, the community, and the families.

You should care about the impact your decisions have on these people. You should want to pick the routes that keep the most families safe and happy. I urge you to strongly consider the choices you make and the people you're going to impact.

Please do not do this.
